Map showing the positions of Messrs. Veitch's Nurseries.

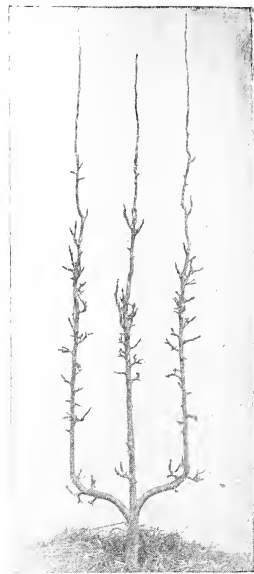

**FORMS OF TRAINED TREES  
TO ILLUSTRATE TERMS USED IN THE CATALOGUE.**

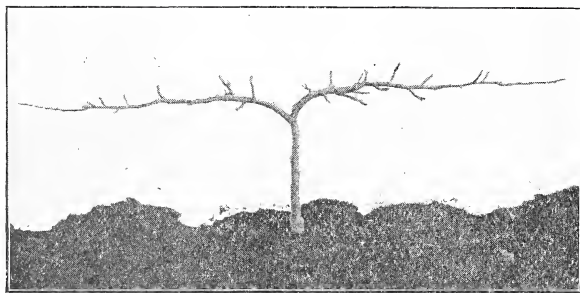

**Cordon—Upright Single.**

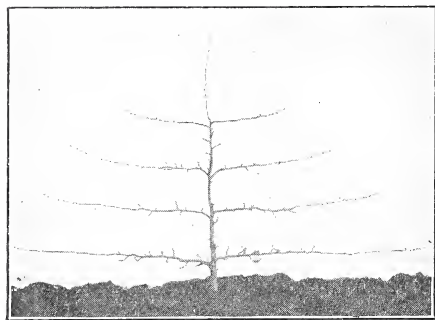

**Cordon—Upright Double.**

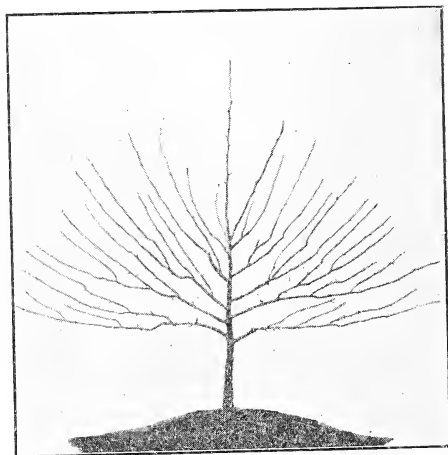

**Cordon—Upright Triple.**

**Cordon—Horizontal Trained.**

**Horizontal Trained.**

**Fan Trained.**

**Fruit Trees** are cultivated both at Langley and Feltham. Full particulars of the various stocks are given on the next page.

**Inspection** of our Fruit Trees is particularly invited, as comparison of prices and Catalogues, without personal inspection of the trees themselves, conveys little or no information to the purchaser.

**Good Results** depend on how the trees have been grown. Our trees have been frequently transplanted, which ensures good results for our customers provided the trees receive proper treatment after they leave our Nurseries.

**Orders by Post** receive the best attention, and customers unable to make a personal call may rely on obtaining trees selected with the greatest care.

**Export Orders** may be entrusted to us with complete confidence as we are accustomed to send our trees, suitably packed, to all parts of the world.

**Cash Discount** at Five per cent. is allowed on Invoices of the value of 20/- or over, if paid within 30 days from date of Invoice.

This discount does not apply to export orders, as the value is made up to the customer in extra strong trees, specially selected to stand the voyage.

This discount also does not apply to special quotations and estimates, which are always strictly nett.

**Gratis Trees** to help towards the cost of carriage, are added whenever the order is sufficiently large.

**Packing Charges** are reduced to the lowest cost, consistent with the well-known high standard of our packing, which ensures plants and trees reaching our customers in the best possible condition. The charges include the cost of all material as well as the skilled labour of our special staffs of packers. Half-price will be allowed on empty crates, boxes and baskets if returned at once in good condition, carriage paid and advised by post. Bundles are not returnable.

James Veitch & Sons, Ltd.  
Chelsea.

The stocks of Fruit Trees, etc. may be seen as follows :—

### **LANGLEY, near SLOUGH.**

Station, Slough, G.W.R.

Cabs always in attendance.

This Nursery adjoins the Great Western Main Line on the North side, and is now well-known for the beautiful colour effects to be seen through the summer from the railway carriage windows, just before entering Slough Station from London.

The Langley New Town entrance of the Nursery is one mile from Slough Station, just off the Road running North from Slough to Uxbridge.

#### **Here are grown**

Apples, Pears and Cherries in all shapes and sizes.

Gooseberries, bushes and trained trees, the latter a great speciality.

Currants and Strawberries.

Medlars, Quinces and Walnuts.

Crab Apples.

Also at this Nursery are grown Herbaceous Perennials and Alpine Plants, Roses, and choice Annuals for seed.

### **FELTHAM, Middlesex.**

Station, Feltham, L.S.W.R. Windsor and Reading Line.

The Nursery is in Bedfont Lane, about 7 minutes' walk from Feltham Station.

Cabs can usually be obtained.

Bedfont Lane turns out of the main road from London to Staines, Ascot and Virginia Water, close to the village of East Bedfont.

#### **Here are grown**

A very fine collection of Fruit Trees in Pots for Orchard House culture.

These are marked \* throughout the Catalogue.

Trained Peaches, Nectarines, Apricots, Plums, Cherries, Apples and Pears in all shapes and sizes.

Grape Vines, Figs, Mulberries, Oranges and Lemons, Raspberries, Loganberries, Nuts and Filberts.

Culinary roots such as Asparagus, Rhubarb, Seakale, etc.

Also at this Nursery are grown Carnations, Chrysanthemums, Begonias, Dahlias, Fuchsias, Gloxinias, and all soft-wooded plants.

## DESSERT APPLES.

	Season
<b>Adam's Pearmain</b> , medium size, handsome and excellent, skin pale yellow covered with delicate russet on the shaded side; the tree forms a medium-sized pyramid and is an excellent bearer in a young state	Dec. to Feb.
<b>Allen's Everlasting</b> , medium size, richly flavoured, a good late variety. F.C.C.	Mar. to May
★ <b>Allington Pippin</b> , medium size, dull yellow streaked with red, rich flavour, hardy robust constitution, good bearer. F.C.C.	Nov. to Feb.
★ <b>American Mother</b> , <i>Mother Apple</i> , medium size, extra fine flavour, juicy, sweet, with a balsamic aroma	October
<b>Baddow Pippin</b> , <i>D'Arcy Spice</i> , <i>Spring Ribston</i> , medium size, fairly flavoured and richly aromatic, very slow grower	Nov. to May
<b>Ballinora</b> , medium size, resembles a scarlet Blenheim, very fine flavour, keeps well. A.M.	Nov. to Jan.
<b>Baxter's Pearmain</b> , medium size, flavour crisp and pleasantly acid, pale green tinged with red, it is hardy, vigorous, and a good bearer	Nov. to Mar.
★ <b>Beauty of Bath</b> , medium size, green spotted and flushed with crimson-red, flesh firm, pale yellow, an early dessert and particularly free-bearing kind. F.C.C.	August
<b>Belle de Boskoop</b> , a large and very handsomely striped apple of good quality, an excellent bearer, of fine flavour. A.M.	Nov. to Feb.
★ <b>Benoni</b> , medium size, rich yellow with a crimson cheek, flesh tender and delicate, sweet, brisk and highly perfumed	Sept. & Oct.
<b>Ben's Red</b> , medium size, flat, rich bronzy-red, the tree is a sturdy grower and a free bearer, an excellent market variety. A.M.	September
<b>Blue Pearmain</b> , of peculiar colour and rich flavour, one of the largest of the Pearmain type, a heavy cropper. F.C.C.	Nov. to Jan.

★ Can be supplied in pots for orchard-house culture.

## VEITCH'S FRUIT TREES

	Season
<b>Boston Russet</b> , medium size with the flavour and high aroma of the Ribston Pippin, suitable for bush culture	Jan. to April
<b>Braddick's Nonpareil</b> , medium size, sweet and aromatic, an excellent late dessert apple, a very free bearer	Dec. to Mar.
<b>Brownlee's Russet</b> , medium size, a fine late apple, very hardy, bearing well in cold soils and situations where others are liable to canker, it forms a medium-sized pyramid and bears well as a standard	Mar. to May
<b>Calville Rouge Précoce</b> , medium size but of great beauty, the skin being of a deep crimson with white spots, it keeps well and although the flavour is not of the best it is worth growing on account of its handsome appearance	Dec. to Feb.
★ <b>Charles Ross</b> , a cross between Cox's Orange Pippin and Peasgood's Nonsuch, fruit handsome and well coloured, of the same shape as Cox's Orange Pippin though more than twice its size. F.C.C.	Sept. & Oct.
★ <b>Christmas Pearmain</b> , medium size, of excellent flavour, the tree is a good grower, an enormous cropper and free from canker	Nov. & Dec.
<b>Claygate Pearmain</b> , medium size, richly flavoured and highly aromatic, similar to Ribston Pippin. A.M.	Nov. to Mar.
<b>Cockle's Pippin</b> , medium size, richly flavoured and highly aromatic, one of the best, bears well as an orchard standard	Feb. to April
<b>Cornish Aromatic</b> , medium size, flesh firm, juicy and highly aromatic, an excellent dessert apple	Oct. to Jan.
<b>Cornish Gilliflower</b> , medium size, juicy, sugary and highly aromatic, a very fine apple, but unfortunately rather a shy bearer, fruiting only on end of shoots	Nov. to April
★ <b>Coronation</b> , a variety much resembling Cox's Orange Pippin but flatter in shape, skin-coloured on the sunny side, flavour excellent, tree of compact habit and a good grower. A.M.	Oct. to Dec.
<b>Court Pendu Plat</b> , medium size, handsome and long-keeping, the tree forms a medium-sized pyramid, is a good bearer and succeeds well as an orchard standard, it is one of the latest flowering varieties known and hence the blossoms escape destruction by spring frosts	Nov. to April
<b>Court of Wick</b> , small, of great excellence, on some soils attaining a very high colour, the tree is a vigorous grower and a good bearer, it makes a good medium-sized pyramid and succeeds well as a standard	Oct. to Mar.
★ <b>Cox's Orange Pippin</b> , medium size, handsome and richly flavoured, the finest dessert apple in cultivation, the tree forms a large and well-shaped pyramid and is an abundant bearer, it also forms a good standard	Nov. to Feb.
<b>Cumberland Favourite</b> , rather large, conical, suitable for dessert or kitchen purposes, it forms a large pyramid and thrives well as an orchard standard, especially suitable for the north of England	Nov. to Jan.
★ <b>Devonshire Quarrenden</b> , medium size, dark red, very early, a showy and good variety, it forms a medium-sized and prolific pyramid and bears equally well as a standard	August
★ <b>Duchess's Favourite</b> , <i>Duchess of Gloucester</i> , small, skin of a brilliant red, yellow on the shaded side, flesh yellowish, juicy and highly flavoured, an excellent dessert apple	Oct. to Dec.
<b>Duke of Devonshire</b> , first quality, late, of medium size with crisp, juicy and rich flavour	Feb. to May
<b>Dutch Mignonne</b> , a medium-sized handsome variety which we can highly recommend, its shoots are thickly set with fruit spurs and it bears abundantly, especially on the paradise stock	Dec. to April

★ Can be supplied in pots for orchard-house culture.

Apple—King of the Pippins, see page 10.

- Season.
- ★ **Egremont Russet**, medium size, golden-russet colour, and rich flavour, compact habit Oct. & Nov.
- Fearn's Pippin**, medium size, richly flavoured, excellent either for dessert or kitchen use, the tree is a good grower, forms a medium-sized pyramid, and is a great bearer. This apple is grown largely for market on account of its high colour and attractive appearance Nov. to Feb.
- Golden Pippin**, the true old variety, the skin is yellow, assuming as the fruit ripens a deep golden hue, it succeeds particularly well on the paradise stock Nov. to April
- Golden Reinette**, medium size and handsome, it forms a medium-sized pyramid and bears well as a standard, particularly in a light and warm soil, an old variety of excellent quality and well flavoured Oct. to Jan.
- ★ **Gravenstein**, large, tender and spicy, suitable for dessert or kitchen use, skin pale yellow streaked with crimson, a favourite variety grown extensively in some parts of Germany, it forms a handsome large pyramid and is a good orchard tree Oct. to Dec.
- Irish Peach**, medium size, an excellent summer apple, in order to have it in perfection (as indeed most of the very early varieties) it should be eaten immediately after gathering, it is a beautiful and refreshing fruit well worthy of a place in every garden, it forms a small pyramid and is suitable for orchard culture early in Aug.
- ★ **James Grieve**, medium size, skin yellow with a red flush on the exposed side, flesh firm, pale yellow with the flavour of Cox's Orange, but the tree is of hardier constitution than that variety, a prolific bearer. F.C.C. Sept. & Oct.
- Joaneting, Red**, see Margaret.
- Joaneting, White**, small, the earliest of all apples and of good flavour, it requires, however, to be eaten fresh from the tree as it soon becomes mealy. It is one of the oldest known and should be cultivated on the paradise stock as otherwise it does not bear freely July & Aug.
- Kerry Pippin**, an old and well-known variety, small, but an excellent early apple of high flavour, it forms a small pyramid and bears well as a standard Sept. & Oct.
- King's Acre Pippin**, *Cranston's Pippin*, fruit of medium size, one side covered with russet, flesh tender, sweet, and of good flavour, a probable cross between Ribston and Sturmer Pippins. A.M. Dec. to Mar.
- King Harry**, medium size, lemon-yellow rather thickly strewed with russet dots, a handsome fruit of fine flavour, forms a fine large pyramid. A.M. Sept. & Oct.
- ★ **King of the Pippins**, medium size, very handsome, of a deep golden colour on the side facing the sun, flesh firm, crisp and juicy, the tree is a great bearer, forming a fine large pyramid or standard, unquestionably one of the best and very valuable either for dessert or kitchen use. See illustration page 9. Oct. to Jan.
- ★ **King of Tompkin's County**, large, hangs on the tree late and keeps well till May when it is an excellent dessert apple, very hardy, free growing and profuse bearer, makes a good standard or pyramid, it is one of the best American varieties, in colour greenish-yellow heavily streaked with crimson on the side facing the sun. A.M. Jan. to May.
- ★ **Lady Sudeley**, large, pale yellow marked with crimson streaks, a fine kind of very handsome appearance, juicy, and of rich flavour, very productive and valuable as an early variety, it forms a compact pyramid. F.C.C. Aug. & Sept.
- ★ **Langley Pippin**, a cross between Cox's Orange Pippin and Mr. Gladstone, fruit of medium size, pale yellow, highly coloured on the side next the sun, flesh white, tender with a pleasant crisp flavour, the tree is healthy and a moderate grower, a most valuable acquisition. A.M. Aug.

★ Can be supplied in pots for orchard-house culture.

Oct. to Dec.

**Lemon Pippin**, medium size, a first-rate dessert variety, good also for kitchen use

**Lord Burghley**, medium size, tender, juicy and richly flavoured, one of the best late varieties and hence its great value, it is very prolific, forms a large pyramid and good standard. F.C.C.

**Lord Hindlip**, medium size, bright russet colour, a good bearer of first-class quality, a valuable addition to the late varieties. F.C.C.

**Mabbott's Pearmain**, medium size, orange-yellow streaked with red, a handsome mid-season apple of first-rate quality, flavour brisk and acid

**Mannington's Pearmain**, medium size, juicy and sweet, the flavour is rich but in order to have it in perfection, the fruit should be allowed to hang late on the tree, it being one of the best late varieties, a good bearer

**Margaret**, *Joaneting*, *Red*, medium size, a finely flavoured early variety. Should be eaten fresh from the tree as it soon becomes mealy, it is a slow grower but succeeds well on the paradise stock, a very old but excellent variety

★ **Margil**, small, richly flavoured and highly perfumed, one of the finest dessert apples, the tree is a slow grower, but forms a neat prolific pyramid and is specially suitable for growing as an espalier

★ **Melon Apple**, a large tender-fleshed American variety, juicy, rich and excellent, when grown as a dwarf its habit is rather that of a bush than a pyramid

**Mr. Gladstone**, medium size, very early, red striped with yellow, good flavour and free bearer, a good early variety for market purposes, it forms a small pyramid and is suitable for the orchard. F.C.C.

**Mrs. Phillimore**, medium size, finely flavoured and aromatic, tree short jointed and a prolific bearer. A.M.

**Newtown Pippin**, medium size of handsome colour, it forms a fair-sized pyramid but is best grown as an espalier against a wall

**Northern Spy**, large and handsome, green with a crimson cheek, tender, juicy and richly aromatic, a fine dessert apple, the tree has an upright habit and forms a fine large pyramid, it is also good as a standard

**Old Nonpareil**, small, crisp, juicy and highly flavoured, an old favourite variety of great excellence

**Parroquet**, medium size, of a deep crimson colour, flesh white, juicy and highly flavoured. A.M.

**Pine Apple Russet**, medium size, flesh yellow, tender and highly perfumed, a valuable variety, forming a large pyramid and good standard

★ **Red Astrachan**, medium size, beautifully coloured and handsomely shaped, flesh delicate and richly flavoured, but requires to be eaten fresh from the tree or it soon becomes mealy, the tree is a healthy and vigorous grower, forming a large pyramid and bears freely

**Reinette du Canada**, large, handsome and excellent, of a greenish yellow colour tinged with brown, valuable for dessert or kitchen use, does not form a good pyramid, the habit being more that of a spreading bush, in which form it generally produces finer fruit than on a standard. A.M.

★ **Ribston Pippin**, a well-known and much valued dessert apple, the tree forms a fine pyramid and is less liable to canker if frequently transplanted, it succeeds best in a dry warm soil, particularly on the paradise stock

★ **Rival**, a seedling from Peasgood's Nonsuch and Cox's Orange Pippin, of moderate size, highly coloured, regular in outline and of fine flavour. A.M.

★ Can be supplied in pots for orchard-house culture.

## VEITCH'S FRUIT TREES

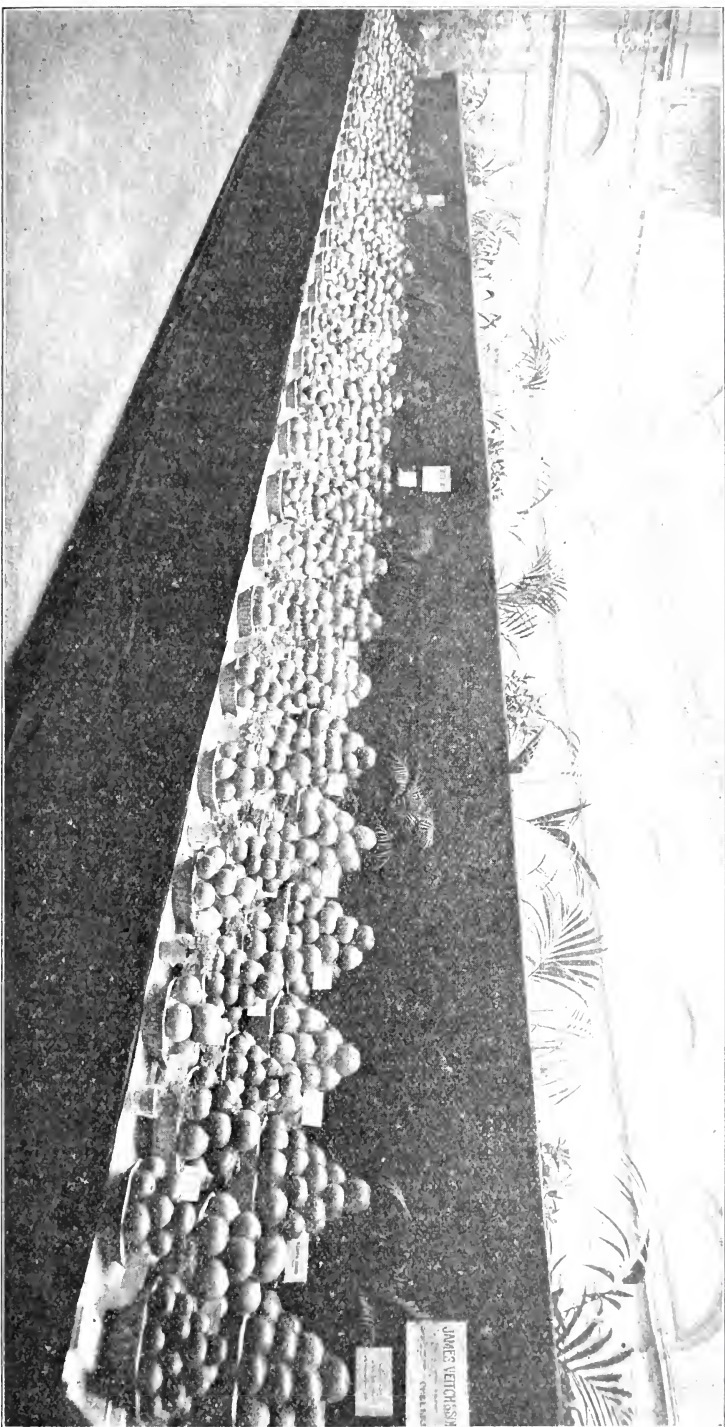

## DESSERT APPLES.

	Season
<b>Rosemary Russet</b> , medium size, skin greenish yellow on the shaded side, flushed with faint red on the side next the sun, flesh juicy, rich with a highly aromatic flavour	Dec. to Feb.
<b>Scarlet Nonpareil</b> , medium size, handsome and well flavoured, the tree forms a medium-sized pyramid and is an abundant bearer, a valuable variety for the orchard. A.M.	Jan. to Mar.
<b>Scarlet Pearmain</b> , medium size, handsome, of a rich bright crimson, striped with a darker tint on the side next the sun, flesh juicy and nicely flavoured, useful and early, it forms a large pyramid and is suitable for orchards	Sept. & Oct.
<b>September Beauty</b> , medium size, yellowish ground with red stripes, a delicious and handsome dessert apple. F.C.C.	September
<b>St. Edmund's Pippin</b> , medium size, skin entirely covered with pale greenish brown russet with here and there some patches of greenish yellow, flesh yellowish, tender, very juicy with a rich aromatic flavour. F.C.C.	October
<b>Sturmer Pippin</b> , medium size, firm and richly flavoured, a valuable late-keeping apple, coming into use when other late varieties are over, it forms a medium-sized pyramid, valuable for the orchard	Feb. to May
★ <b>The Houblon</b> , medium size, a seedling from Cox's Orange Pippin, with a very attractive colour. A.M.	Nov. to Jan.
<b>Venus Pippin</b> , medium size, a good flavoured early fruit. A.M.	Aug. to Sept.
★ <b>Washington</b> , large, very handsome, rich, aromatic and melting, requires a warm situation and is particularly fine when ripened under glass, as a dwarf it forms more of a bush than a pyramid, it also bears well as a standard	Sept. & Oct.
★ <b>Wealthy</b> , medium size, very handsome dark red, flesh soft and juicy with a rich flavour, an American variety of great excellence, a free grower and good cropper. F.C.C.	Oct. & Nov.
<b>Werder's Golden Reinette</b> , medium size, very handsome pale yellow, flesh white, of fine flavour, it forms a good pyramid and is suitable for orchard culture as a standard. A.M.	Sept. & Oct.
★ <b>White Calville</b> , large, very uneven in form, flesh white and delicate, valuable for dessert or sauce, the tree is tender and requires a wall, particularly useful for pot culture under glass	Jan. to April
<b>Wismer's Dessert</b> , medium size, a fine American fruit of good flavour, excellent habit	December
★ <b>Worcester Pearmain</b> , medium size, skin completely covered with red, flesh tender, juicy and well flavoured, very early and of good quality, a valuable kind for the orchard, and succeeds well on paradise stock. F.C.C.	Aug. & Sept.
<b>Wyken Pippin</b> , small and handsome, juicy, crisp and richly flavoured, the tree forms a dwarf pyramid and bears well, suitable for orchard or garden culture	Dec. to April
<b>Yellow Ingestrie</b> , a very pretty little yellow apple, of first-rate quality, flesh yellow, crisp and delicate, it forms a small pyramid and is suitable for orchard culture	Sept. & Oct.

## SUPPLEMENTARY LIST OF DESSERT APPLES.

Mannington Pearmain  
Reinette du Canada.

### MARCH—APRIL—MAY.

Allen's Everlasting  
Brownlee's Russet

Cockle's Pippin  
Duke of Devonshire

Lord Burghley  
Sturmer Pippin.

The varieties of apples described in the preceding section can be supplied as pyramids and trained trees, both on the paradise and crab stock, also as standards for orchard.

The varieties—American Mother, Melon, Boston Russet, Newtown Pippin, Northern Spy, King of Tompkin's County, Washington, &c., are of American Origin, and should be planted in a warm situation and well-drained soil to prevent the fruits becoming spotted, to heighten its colour, and to strengthen the flavour as much as possible. When grown in this manner they are of very fine quality. Late apples, and especially russets, should be left on the trees as long as possible; if gathered early they are apt to shrivel.

Apple—Bismarck, see page 16.

## KITCHEN APPLES.

- ★ **Alexander**, large and handsome, flesh juicy with a pleasant aromatic flavour, a variety which when grown under glass produces particularly handsome fruit, it forms a large pyramid and is suitable for the orchard Season  
Sept. to Dec.
- Alfriston**, very large, flesh white and briskly acid, one of the best kitchen apples, the tree is a good bearer and forms a handsome pyramid and good standard Nov. to April
- Annie Elizabeth**, large and firm, will keep eight months, the tree is of robust growth and bears abundantly, it forms a large pyramid and a good standard. F.C.C. Feb. to May
- Barnack Beauty**, medium size, streaked with red, very firm, a useful late variety, a great bearer, especially when grown as a pyramid on either stock, it also forms a good medium sized standard. A.M. April & May
- Saron Wolseley**, very large, fruit like Warner's King with bronzy flush, vigorous growth Dec. & Jan.
- Baumann's Red Reinette**, *Reinette Baumann*, medium size, highly coloured the skin being covered with red which becomes very deep on the side exposed to the sun, flesh firm and slightly acid, a good keeper and a particularly fine exhibition variety, tree very prolific, it forms a small pyramid and is suitable for orchard culture. F.C.C. Dec. to Mar.
- ★ **Beauty of Kent**, *Flower of Kent*, very large and handsome, vigorous grower and good bearer, forming a large pyramid and a good standard. A.M. Oct. to Feb.
- Beauty of Stoke**, large, somewhat conical and very heavy, of a uniform russet-brown colour, keeps in perfection for a long time, one of the best kitchen apples in cultivation. It is very productive both as a pyramid and standard, it also forms excellent standards, rarely failing to produce a crop. F.C.C. Nov. to Mar.
- Belle Pontoise**, large and heavy, yellow with red streaks, Blenheim Pippin shape Dec. to Feb.
- Bess Pool**, medium size, an excellent late apple, suitable for kitchen use or dessert, this variety is, unfortunately, too shy bearing for general cultivation and is only suitable for the orchard Dec. to April
- Bielo Borodawka**, medium size, rich flavour and beautiful appearance, free bearer, sturdy growth September
- ★ **Bismarck**, a large, handsome fruit, skin yellow, flushed and striped with red, very free bearing, both on the crab and paradise stocks, keeps well and retains its flavour till the end of April. F.C.C. See illustration page 15 Dec. to April
- ★ **Blenheim Orange**, *Blenheim Pippin*, large, handsome and excellent, one of the best for kitchen use or dessert, when grown as a dwarf it forms a spreading bush or pyramid, young standards do not generally bear well, but as the tree ages it improves in fertility. See illustration on cover Nov. to Feb.
- Bow Hill Pippin**, a large and handsome fruit of the Peasgood's Nonsuch type, excellent both for dessert and Kitchen use, more suitable to be grown as a bush than a pyramid. A.M. Oct. to Feb.
- Bramley's Seedling**, large, flesh solid, a good keeper, one of the best kitchen varieties, tree hardy, robust and healthy grower, forming a fine pyramid on either stock, and a good standard. F.C.C. See illustration page 17 Jan. to Mar.
- Byford Wonder**, large, excellent keeper, of the Warner's King type. F.C.C. Mar. & April
- Calville des Femmes**, above medium size, bright yellow skin and firm flesh, forms a good cordon and pyramid, very heavy cropper Dec. to May

★ Can be supplied in pots for orchard-house culture.

**Bramley's Seedling, see page 16.**

	Season
<b>Calville Malingre</b> , handsome, distinct, medium size and of a deep red colour on the side facing the sun, flesh firm and juicy, it forms a medium-sized pyramid	Jan. to April
<b>Calville Rouge d'Automne</b> , medium size, handsome, conical fruit, skin deep crimson next the sun, pale red marked with yellowish dots on the shaded side, flesh white, tender and juicy, with a pleasant vinous flavour	Oct. & Nov.
<b>Cellini</b> , medium size, beautifully coloured and handsomely shaped, a good kitchen and dessert apple, it forms a large pyramid and bears well as a standard. See illustration page 19	Oct. & Nov.
<b>Chelmsford Wonder</b> , like King of the Pippins but larger and more solid, yellow with some red spottings on the exposed side, a good bearer. F.C.C.	April & May
<b>Christie Manson</b> , large, with firm flesh of excellent quality and one of the best for keeping, forms healthy spreading pyramids and standards, very prolific, much grown in Norfolk	Mar. to May
<b>Cox's Pomona</b> , large and very handsome, a fine kitchen apple, the tree forms a good pyramid and is a great and constant bearer	October
<b>Domino</b> , large, bluntly conical and prominently ribbed, greenish yellow skin, a good early apple, especially suitable for tarts, in many places it bears as freely as Keswick Codlin and keeps much longer; a good grower on either stock	Sept. and Oct.
<b>Duchess of Oldenburgh</b> ( <i>Borovitski</i> ), large, flesh yellowish white, crisp and juicy, it forms a medium-sized pyramid and good standard, heavy cropper	Aug. & Sept.
<b>Duke of Beaufort</b> , large and roundish, dark green, with russett dots on the shaded side, dull red on the exposed side, flesh firm and acid, it forms a medium-sized pyramid	Jan. & Feb.
<b>Dumelow's Seedling</b> ( <i>Wellington</i> ), large, firm and briskly acid; one of the finest kitchen apples, the tree forms a handsome pyramid and is a great bearer, either as such or a standard	Nov. to Mar.
<b>Early Rivers</b> , of the Lord Suffield type but ripening earlier and not shrinking in cooking, flavour brisk and agreeable, tree robust	Sept. & Oct.
<b>Early Victoria</b> , medium, pale codlin, one of the best for early use, very free	July & Aug.
<b>Easter Pippin</b> ( <i>Winter Greening</i> ), medium size, will keep for two years, the tree is a great bearer, forming a medium-sized pyramid and a good standard	Nov. to May
<b>Ecklinville Pippin</b> , large, the tree forms a good pyramid and is a constant cropper, an early variety of first quality	October
<b>Edward VII.</b> , a seedling from Blenheim Orange and Golden Noble, the fruit resembling that of the last-named variety have the open eye of Blenheim Orange and a distinct trace of its flavour, flowers late, keeps till June. A.M.	Mar. to May
<b>Frogmore Prolific</b> , large, flesh white, tender and juicy, tree hardy and a constant bearer, both as pyramid and standard, more prolific than the old Hawthornden and more worthy of general cultivation	Sept. & Oct.
<b>Gabalva</b> , large, spicy flavour. A.M.	February
★ <b>Gascoigne's Seedling</b> , large, pale yellow streaked and flushed with rose, a good grower and bearer, and forms a good standard. F.C.C.	Oct. to Jan.
<b>Gloria Mundi</b> ( <i>Belle Dubois</i> ), very large, of a handsome pale green colour, flesh tender and juicy, one of the best, it forms a large pyramid and bears well as a standard	Oct. to Jan.
<b>Golden Noble</b> , large and exceedingly handsome in form and colour, flesh yellow, tender with a brisk acid juice, it forms a medium-sized pyramid and good standard	Sept. to Dec.
<b>Golden Spire</b> , medium size, of a pale yellow colour, tender, with a pleasant acidity, a good free bearer	Oct to Dec.
<b>Grantonian</b> , large, skin yellowish green, yellow on exposed side, flesh greenish white and firm, a free grower and heavy cropper	Nov. to Feb.

★ Can be supplied in pots for orchard-house culture.

Cellini, see page 18.

	Season
<b>Grenadier</b> , large and round with a clear yellow skin, a good and constant cropper, it forms a medium-sized pyramid and bears well as a standard. F.C.C.	Oct. & Nov.
<b>Hambling's Seedling</b> , very large, heavy and of good quality, bright yellow skin, flesh firm with brisk flavour, tree robust, forming a spreading pyramid and large standard. F.C.C.	Dec. to April
<b>Hanwell Souring</b> , medium size, greenish russet streaked with red, a valuable kitchen apple, with firm and briskly acid flesh, more suitable for culture as a bush than a pyramid	Dec. to Mar.
<b>Hawthornden</b> , medium size, excellent and prolific, flesh juicy with an agreeable and pleasant flavour, forms a small pyramid	Oct. to Dec.
<b>Hector Macdonald</b> , large, oval, pale yellow, shaded bright red, a good grower and very fertile	Oct. & Nov.
<b>Herefordshire Beaufin</b> , medium size, dark chestnut-brown veined and dotted with cinnamon-red, an excellent variety and great bearer, it forms a medium-sized pyramid and succeeds well as a standard	Dec. & Jan.
<b>Hoary Morning</b> , medium size, handsome and finely coloured, bright red, with dense grey bloom, it forms a large pyramid and a good standard	Oct. to Dec.
<b>Hollandbury</b> , large, roundish and flattened, skin deep yellow tinged with green on the shaded side, suffused with bright scarlet where exposed to the sun, flesh white tinged with green, brisk, juicy and tender, it forms a good pyramid and succeeds well on the paradise stock	Oct. to Dec.
<b>Hormead Pearmain</b> , large, conical and even, flavour brisk and of first quality, a very handsome apple and one we can highly recommend. A.M.	Oct. to Mar.
<b>Kentish Fillbasket</b> , large and excellent, yellowish green, flushed and streaked with red, a good bearer	Nov. to Jan.
<b>Keswick Codlin</b> , a well-known early kitchen apple, pale yellow sometimes flushed with orange, flesh brisk and tender, can be used very early for tarts, forms a handsome medium-sized pyramid and is a great bearer, suitable for orchard culture	Aug. & Sept. Sept. to Nov.
<b>King's Acre Bountiful</b> , heavy cropper, a splendid kitchen apple	
<b>Lady Henniker</b> , large and very handsome, yellow on the shaded side, on the exposed side a reddish blush with crimson streaks, flesh well flavoured and with a pleasant perfume, useful also for dessert, it forms a bush and a good orchard standard. F.C.C.	Oct. to Feb.
<b>Lansberger Reinette</b> , medium size, pale yellow flushed with crimson on the exposed side, a good bearer. F.C.C.	Oct. to Dec.
<b>Lane's Prince Albert</b> , large and handsome, pale green striped and flushed with red, somewhat like Cellini but later, a variety which no garden should be without, it forms a medium-sized pyramid or standard	Oct. to Mar.
<b>Lawry's Cornish Giant</b> , an excellent kitchen apple that should be largely planted, fruit large, highly coloured, resembling Cox's Pomona in shape, one of the best of its season	Sept. to Feb.
<b>Lewis's Incomparable</b> , large, excellent and very handsome, suitable for kitchen or dessert use, it forms a medium-sized pyramid or standard	Dec. to Feb.
<b>Lord Derby</b> , very large and fine, roundish, dark grass-green with a few russet dots and streaks, a strong grower and great bearer, a variety of first quality	Nov. to Dec.
<b>Lord Grosvenor</b> , large, prominently ribbed, skin of a yellowish straw colour, flesh white, tender and slightly acid, a very valuable early variety, bearing very freely	Sept. to Nov.
<b>Lord Stradbroke</b> , very large yellow suffused red	January.

★ Can be supplied in pots for orchard-house culture.

- Lord Suffield**, very large, skin pale yellow, flesh white, tender and briskly flavoured, one of the very best early varieties and a great cropper Aug. & Sept.
- Mank's Codlin**, medium size, excellent, very prolific even in a young state, it forms a small pyramid on the paradise stock, a valuable kitchen variety Aug. to Oct.
- ★ **Mère de Ménage**, very large and handsome, reddish bronze streaked, flesh firm and solid, the fruit is somewhat flat but often attains an enormous size Oct. to Mar.
- Mrs. Barron**, large, skin pale yellow, flesh sweet and of first quality; it bears freely when grown as a pyramid on either stock and is equally good as a standard, a fine variety for exhibition Oct. to Feb.
- ★ **Newton Wonder**, large, solid and keeps late, forms a good pyramid or standard, very prolific, the best of recent introductions. F.C.C. Nov. to May
- Norfolk Beaufin**, medium size, of a dull bronze colour, briskly flavoured; a highly esteemed long-keeping apple, succeeds best in a rich soil, it forms a large pyramid and standard Dec. to May
- Norfolk Beauty**, stated to be a chance seedling from Warner's King and Waltham Abbey Seedling, it bears some resemblance to these two varieties, skin yellow with a trace of red on the sunny side, a heavy and constant cropper. F.C.C. Sept. to Jan.
- North End Pippin**, large and very firm, its chief excellence is its lateness, it forms a good pyramid and standard April & May
- Northern Greening**, medium size, firm and sub-acid, a variety of first quality, the tree is a good bearer and forms a medium-sized pyramid or standard Nov. to May
- Ontario**, large, an excellent free-bearing Canadian fruit, very useful. A.M. May
- ★ **Peasgood's Nonsuch**, large and handsome, greenish yellow flushed and streaked with red, very valuable variety and one of the best for exhibition, grows well either as a pyramid, bush or standard. F.C.C. Sept. to Nov.
- Potts' Seedling**, large, of a pale yellow colour, of first quality and very free bearing, it forms a medium-sized pyramid or standard Sept. to Nov.
- Red Bietigheimer**, large, roundish in form and finely coloured, flesh white, firm, sub-acid and with a brisk pleasant flavour, more suitable for culture as a bush than a pyramid Oct. & Nov.
- Royal Jubilee**, large, clear lemon colour, a valuable kitchen apple, being a late-flowering variety it escapes the late spring frosts and seldom fails to produce a good crop Oct. to Mar.
- Royal Late Cooking**, large, sweet and juicy, of a sub-acid flavour. It has excellent cooking qualities and will keep in perfect condition from nine to twelve months after being gathered. The tree is robust and free from canker, bears well when only two or three years old. A.M. Feb. to Mar.
- Royal Russet**, medium size, a first-class kitchen fruit, its habit when grown as a dwarf is more that of a bush than a pyramid, suitable for orchard culture Nov. to May
- Rymer**, medium size, skin smooth, of a beautiful deep red on the side facing the sun, flesh firm, juicy and briskly flavoured, it forms a large pyramid and good standard Oct. to Mar.
- Sandringham**, large and handsome, yellow flushed and striped with red, very free bearing on either stock. A good kitchen apple that keeps well and retains its flavour till the end of March. F.C.C. Dec. to Mar
- Schoolmaster**, medium size, obtusely ribbed, greenish yellow covered all over with large russet freckles and having a pleasant acid flavour, pale rose on exposed side, a good and constant cropper, one of the best kitchen varieties. F.C.C. Feb. to April
- Seaton House** (*Niton House*), medium size, round and regularly shaped like Stirling Castle, keeping till March, it is a good grower and bears well, a pale green streaked apple Feb. & Mar.

★ Can be supplied in pots for orchard-house culture.

## VEITCH'S FRUIT TREES

## KITCHEN APPLES.

	Season
<b>Stirling Castle</b> , large, a desirable early apple, the tree is a great and constant bearer, forming a small pyramid and good standard	Aug. & Sept.
<b>Stone's or Loddington Seedling</b> , large and handsome, lemon-yellow, flushed slightly with red on the side facing the sun, it bears early and well	Oct. to Dec.
<b>Striped Beaufin</b> , large and handsome, skin green, heavily striped with red, flesh crisp and pleasantly acid, a good bearer, it forms a large pyramid and is very suitable for orchard planting	Nov. to May
<b>The Queen</b> , large and handsome, greenish yellow, profusely streaked with red, flesh tender and acid, a variety of first quality, it forms a large pyramid and good standard. F.C.C.	November
<b>Tom Putt</b> , medium size, handsome, bright red, flesh yellowish and sweet, a great favourite in the western but little known in the southern counties.	November
<b>Tower of Glammis</b> , large and handsome, pale green, flushed, flesh firm and pleasantly acid, a very prolific and valuable variety, good as a pyramid or standard.	Nov. to Feb.
<b>Twenty Ounce</b> , large size, pale green striped with red, flesh soft, highly flavoured, it forms a good bush or pyramid on the paradise stock.	Nov. to Dec.
★ <b>Tyler's Kernel</b> , large, bright red, paler on the shaded side, flesh juicy, with pleasant acidity, a good grower. F.C.C.	Oct. to Jan.
<b>Wadhurst Pippin</b> , medium size, yellowish on the shaded side, bronzy red streaked with crimson on the side exposed to the sun, flesh juicy and briskly flavoured, a first-rate variety	Oct. to Feb.
<b>Wagener</b> , medium, bright scarlet, very late with quince-like flavour, good bearer	April & May
<b>Waltham Abbey Seedling</b> , large and handsome, of a yellowish colour, darker on the side exposed to the sun, the tree is a great bearer, and forms a fine pyramid or standard	Sept. to Jan.
★ <b>Warner's King</b> , very large and handsome, green changing to yellow as it ripens, the tree is a vigorous grower and a good bearer, it forms a good standard and a large pyramid	Oct. & Nov.
<b>White Transparent</b> , medium size, an enormous bearer, valuable for market and recommended for seaside. A.M.	July & Aug.
<b>Winter Hawthornden</b> , large and good. much resembles the old Hawthornden but larger and later, a very handsome variety and a good cropper, it forms a large pyramid and is very suitable for orchard culture	Dec. & Jan.
<b>Winter Queening</b> , <i>Sussex Duck's Bill</i> , medium size, pale green shaded with red, and marked on the shaded side with a thin coat of russet, flesh tender and richly flavoured, an excellent kitchen apple, also suitable for dessert	Dec. to Mar.
<b>Withington Fillbasket</b> , very large yellowish green, deeper on the side exposed to the sun, flesh firm and crisp, an excellent apple	Sept. & Oct.
<b>Yorkshire Greening</b> , large, juicy, tender and good, with an agreeable acidity, a very fine kitchen apple, the tree is a rambling grower and is more suited for culture as a bush than as a pyramid	Oct. to Jan.

★ Can be supplied in pots for orchard-house culture.

Season

**Alberge de Montgamet**, small, early and good, a hardy kind, used chiefly for preserving

end of July

**Breda**, small and nicely flavoured, a very hardy kind, it may be grown as a standard

end of Aug.

★ **D'Alsace**, a large variety of Moorpark type, the tree is vigorous and not so liable to die off as Moorpark

end of Aug.

★ **Early Moorpark**, in all respects resembling Moorpark but ripens three weeks earlier

beg. of Aug.

★ **Hemskerk**, a good hardy kind, much resembling Moorpark

e July, b Aug.

★ **Kaisha**, medium size, earlier than Moorpark, richly flavoured and excellent, the tree is a great bearer

mid. of Aug.

★ **Large Early**, large, juicy and richly flavoured

end of July

★ **Large Red**, *Gros Rouge*, large, juicy rich and highly coloured, tree hardy

e Aug. b Sep.

★ **Moorpark**, large, juicy, rich and excellent, the finest flavour of all

end of Aug.

★ **New Large Early**, like the Old Large Early, but very rich

beg. of July

★ **Oullins Early**, an early form of the Peach apricot, of large size and delicious flavour, a good bearer

beg. of July

★ **Peach**, large, juicy, sweet and rich, one of the best

end of Aug.

★ **Pine Apple**, large, golden yellow with highly-coloured red cheek, flesh tender with a rich pine apple flavour

mid. of Aug.

★ **Powell's Late**, fruit highly coloured, rich and juicy, hardy free-bearing kind, resembling Moorpark, one of the best and hardiest in cultivation

end of Aug.  
beg. of Sep.

★ **Royal**, large and well-flavoured

beg. of Aug.

★ **Shipley's**, large, early, a useful variety for preserving, the tree is a good bearer

beg. of Aug.

★ **St. Ambroise**, large, very juicy and rich

mid. of Aug.

★ **Turkey**, medium size, juicy and pleasantly sub-acid, excellent for preserving

mid. of Aug.

★ Can be supplied in pots for orchard-house culture.

# BARBERRY.

BERBERIS VULGARIS.

The scarlet fruit of this species forms a very pleasant and useful preserve.

Price 6d. to 1/6 each.

# BLACKBERRIES.

RUBUS.

The following varieties are chiefly of American origin and not only produce very large fruit but also an immense quantity, especially Laciniatus and Wilson Junior; the fruit makes a valuable preserve. There are many other varieties, but we consider the following are most worthy of cultivation.

9/- per doz.

60/- per 100.

Japanese Wineberry  
Kittatiny

Laciniatus  
Lawton

Wilson Junior, A.M.

# CHERRIES.

	Each	Each
Dwarf maidens	12/- per doz.	1/6
Fan trained, 7 to 13 shoots		3/6 to 5/-
" " 15 " 20 "		5/- 7/6
" " extra fine, full of buds		7/6 15/-
Cordons, upright single		2/- 5/-
" " double and triple		3/6 7/6
Pyramids, 3 to 4 ft.		3/6 5/-
" 4 " 5 ft.		5/- 7/6
Pyramids in pots for orchard-house culture of the varieties marked thus *		5/- 10/6
Standards for orchards		2/- 3/6
" " " extra size		5/- 7/6
" trained		5/- 10/6

Special quotations for large quantities.

There is little doubt that the best way to obtain the finest Cherries is to cultivate them under glass. The varieties marked thus † are the most highly recommended for that purpose.

Grown in this manner, owing to immunity from attacks of birds, or any check from unfavourable weather, they gain not only in size but high flavour and colour bearing abundantly and well repaying any extra cost. Upright cordons do well, and those of the Duke section budded on the Mahaleb stock thrive and fruit freely.

We also recommend pyramid Morellos for special notice as they fruit freely, and are useful in deficiency of wall space; they should be kept pinched to three or four leaves.

The letter D against a variety implies that it belongs to the Duke section.

	Season
<b>Archduke D</b> , large, richly and briskly flavoured, at first pale, then becoming dark red and when fully ripe almost black, later than May Duke	mid. of July
* <b>Bedford Prolific</b> , large black, closely resembles the Black Tartarian but the tree is hardier, a free grower and prolific bearer	beg. of July
† <b>Belle d'Orleans</b> , medium size, yellowish white and pale red, juicy and richly flavoured, one of the earliest and best	mid. of June

\* Can be supplied in pots for orchard-house culture.

## CHERRIES.

27

Season

†★ <b>Bigarreau</b> , large, pale yellow marbled with red, flesh firm, rich and highly flavoured, very hardy, vigorous and a free bearer, hence very suitable for orchard planting, one of the oldest and best	end of July
†★ <b>Bigarreau de Schreken</b> , a fine early black Bigarreau, richly flavoured and very prolific. F.C.C.	June
★ <b>Bigarreau Jaboulay</b> , large, sweet and delicious, dark red	June
†★ <b>Bigarreau Napoleon</b> , very large and handsome, pale yellow mottled with red, firm, juicy and richly flavoured, the tree is a great bearer and makes a handsome standard	beg. of Aug.
★ <b>Bigarreau Noir de Guben</b> , large, very lustrous in colour, prolific bearer	July
★ <b>Bigarreau Noir de Schmidt</b> , a large black cherry, richly flavoured F.C.C.	July
†★ <b>Black Eagle</b> , medium size, black, richly flavoured, a great bearer	beg. of July
★ <b>Black Heart</b> , a favourite old cherry	beg. of July
†★ <b>Black Tartarian</b> , very large, deep black, handsome and of first quality; the tree is tender, this variety is particularly fine when grown under glass, and bears freely, one of the very best	end of June
★ <b>Bohemian Black Bigarreau</b> , large, black, firm, rich and finely flavoured	end of June
★ <b>Early Lyons</b> , very large, of a mahogany colour mottled blood-red, flesh tender and well flavoured	beg. of June
† <b>Early Red Bigarreau</b> , large, red, rich and excellent	mid. of June
†★ <b>Early Rivers</b> , very large black, flesh tender and sweet, with a small stone, F.C.C.	mid. of June
†★ <b>Elton</b> , very large, pale yellow stained with red, deliciously flavoured, a vigorous grower and excellent bearer	early in July
†★ <b>Emperor Francis Joseph</b> , a large rich late cherry. F.C.C.	end of July
†★ <b>Empress Eugénie</b> D, large, spotted with crimson and pink, an excellent early variety of the May Duke type	end of June
†★ <b>Florence</b> , large, pale yellow, very firm and well flavoured, flesh tender and juicy, succeeds best against a wall	mid. of Aug.
★ <b>Frogmore Early Bigarreau</b> , large, pale yellow marbled with red, tender, juicy and finely flavoured, of good constitution and an abundant bearer, one of the most valuable varieties. F.C.C.	beg. of July
†★ <b>Géant de Hedelfingen</b> , large, black, highly flavoured, an extra fine variety. F.C.C.	July & Aug.
†★ <b>Governor Wood</b> , large, pale red, juicy, sweet and richly flavoured, one of the best	early in July
†★ <b>Guigne d'Annonay</b> , medium size, black, rich flavour, very early, F.C.C.	mid. of June
★ <b>Guigne de Winkler</b> , bright red, luscious and juicy, hangs late	Sept. & Oct.
†★ <b>Knight's Early Black</b> , large black, tender and juicy, a free grower and good bearer	end of June
†★ <b>Late Duke</b> D, large, bright red, sub-acid and richly flavoured when fully ripe, of great value as a late variety	end of Aug.
†★ <b>May Duke</b> D, large dark red, tender, juicy, richly flavoured and agreeably acid, one of the best	beg. of July
★ <b>Morello</b> , the best for kitchen purposes, very suitable for growing against a north wall, succeeding better than any other kind, good also as a pyramid and standard	July & Aug.
★ <b>Noble</b> deep reddish black, extra large, flesh firm, a fine late variety. F.C.C.	July
†★ <b>Reine Hortense</b> D, very large, long and handsome, bright red, tender, juicy and agreeably flavoured	mid. of July
★ Can be supplied in pots for orchard-house culture.	

## VEITCH'S FRUIT TREES

## CHERRIES.

	Season

<b>2/6 to 3/6 each.</b>	

## RED CURRENTS.

**American Wonder**, bright colour, flesh firm, very large  
**Cherry Currant**, very large, deep red, early  
**Fay's Prolific**, very dark, large and fine, a valuable variety  
**Fox's Large Grape**, large free cropper  
**La Constante**, large, the best of all the late varieties  
**La Fertile**, large and good, very prolific  
**La Hative**, a large-fruited early variety, good flavour  
**La Versailles**, large and good, an abundant bearer  
**Raby Castle**, bright colour, bunches large and long, late  
**Red Dutch**, one of the best for general purposes  
**Warner's Grape**, bunches large and long, berries large

## BLACK CURRENTS.

**Baldwin's Black**, heavy cropper  
**Black Naples**, very large and good, one of the best  
**Boskoop Giant**, extra fine, vigorous grower. F.C.C.  
**Carter's Champion**, a very fine large variety, excellent for exhibition  
**Lee's Prolific Black**, well flavoured and very prolific, one of the best of the black kinds.  
 F.C.C.  
**Ogden's Black**, a useful hardy black variety.

## WHITE CURRENTS.

**White Dutch**, sweet and well flavoured  
**White Dutch Cut-leaved**, the bunches and berries are larger than the preceding  
**White Versailles**, berries large, excellent cropper

## FIGS.

	Each	Each
<b>Dwarf trained</b>	5/-	to 10/6
<b>In pots, all the varieties named below</b>	3/6	21/-
<b>Standards, 4 to 5 ft. stems</b>	7/6	25/-

**Figs should be potted in good fibrous loam with crushed lime rubble and bone and ample drainage. When started into growth liquid manure may be freely used with an occasional top dressing of guano and as soon as the shoots have made from five to six leaves pinch off the growing point.**

- Angélique**, medium size, greenish yellow, sweet and good, forces well, bears freely
- Black Bourjassote**, medium size, flesh deep red, juice thick and syrupy, excellent. F.C.C.
- Black Ischia**, medium size, deep purple, flesh deep red, sweet and luscious, the tree is hardy, an excellent bearer and well adapted for pot culture
- Bourjassote Grise**, medium size, brown, flesh dark red with a thick juice, very rich. F.C.C.
- Brown Ischia**, medium size, light brown, rich and excellent, forces well and bears freely
- Brown Turkey**, large, brownish purple, richly flavoured, the best fig for general cultivation, it forces well, may be grown against walls in the open air and in pots, and bears abundantly
- Brunswick**, large and excellent flavour, well adapted for outdoor cultivation
- Castle Kennedy**, very large and handsome, the tree is a vigorous grower but a shy bearer. F.C.C.
- Col di Signora Bianca**, medium size, greenish yellow, flesh dark red, rich and delicious
- Grosse Verte**, very large, greenish yellow, flesh dark red, richly flavoured. F.C.C.
- Negro Largo**, large, black, flesh pale red, very tender and highly flavoured, good bearer and suitable for pot culture, it bears well when planted against a wall, provided the roots are occasionally pruned. With a little care this variety will bear a good crop in the late autumn and winter. A variety of first quality. F.C.C.
- Osborn's Prolific**, medium size, white flesh of good quality, free bearing
- Pingo de Mel**, fruit nearly as large as Brown Turkey, with yellowish flesh that is very juicy and as sweet as honey, the plant is free-growing, of good habit, a very free bearer and very early. F.C.C.
- St. John's**, a large fruit with white flesh that is sweet, rich and juicy, the tree grows freely and is an excellent bearer and very early. F.C.C.
- Violette de Bordeaux**, large and long, black, juicy, sweet and excellent.
- Violette Sepor**, a very large dark-fleshed fruit, syrupy, very sweet and luscious, plant dwarfish, free bearing, with stout, short-jointed branches. F.C.C.
- White Ischia**, *Singleton*, small, yellow, flesh purple, sweet and richly flavoured, a great bearer and well adapted for forcing and pot culture
- White Marseilles**, large and round, pale yellowish green, very rich and excellent, bears abundantly in pots and against the walls in the open air, forces well

A house of Fig Trees in fruit at Feltham.

In pots for planting

„ extra strong for forcing

Each.

5/- and 7/6

10/6 to 15/-

**Alicante**, black, bunches large, berries olive-shaped, flesh very tender, a fine late-keeping grape

**Alnwick Seedling**, Bell's, black, a large handsome grape. F.C.C.

**Appley Towers**, black, a very good late variety, will hang for a long time. F.C.C.

**Barbarossa**, *Brizzola Rosea*, *Prince Albert*, black, produces large bunches and hangs late

**Black Prince**, *Boston*, *Pocock's Damascus*, *Stewart's Black Lisbon*, *Spanish*, *Bidswell's Seedling*, black, long bunches, berries medium size with a rich sugary flavour, an excellent grape that ripens well in a cool vinery

**Buckland Sweetwater**, white, an excellent early grape

**Diamond Jubilee**, black, a late oval-shaped grape, large and well coloured

**Dr. Hogg**, white, round, Muscat flavour. F.C.C.

**Duke of Buccleuch**, white, very large berries, succeeds under the same treatment as Black Hamburg. F.C.C.

**Foster's Seedling**, white, bunches large, richly flavoured, an early and excellent grape

**Frankenthal**, *Black Tripoli*, *Merrick's Victoria*, *Victoria Hamburg*, *Pope's Hamburg*, black, very handsome, large bunches, berries roundish, flesh firm and richly flavoured

**Frontignan, Grizzly**, red, very richly flavoured, the most piquant of all grapes

**Frontignan, White**, white, berries of medium size, richly flavoured

**Golden Champion**, yellow, very large berries with Black Hamburg flavour

**Golden Queen**, amber, bunches large, flesh firm, very juicy. F.C.C.

**Gros Colmar**, *Grosse Kölner*, black, large, round berries, one of the best late kinds.

**Gros Maroc**, purple, berries large and oval, covered with blue bloom, very handsome. F.C.C.

**Hamburg, Black**, *Knevet's Black*, *Red Hamburg*, *Hampton Court*, *Warner's Hamburg*, black, a well-known and delicious grape, the best for general use, pot culture and forcing

**Hamburg, Mill Hill**, black, very large bunches, immense berries, excellent flavour

**Lady Downe's Seedling**, black, a splendid late hanging grape with firm flesh

**Lady Hastings**, black, large berries, brisk Muscat flavour, a sport from Muscat Hamburg, but a more vigorous grower F.C.C.

**Lady Hutt**, white, a late variety of excellent flavour. F.C.C.

**Madresfield Court**, black, bunches large, berries large, oblong or oval, of the greatest merit. F.C.C.

**Melton Constable**, black, large, roundish berries, hangs late

**Mrs. Pearson**, amber, bunches large, flesh juicy and exceedingly rich. F.C.C.

**Mrs. Pince's Black Muscat**, purplish black, bunches large, berries medium size, Muscat flavour. F.C.C.

**Muscadine, Royal**, *Chasselas de Fontainbleau*, *Amber Muscadine*, *White Chasselas*, *Chasselas Dore*, white, an excellent early grape, and one of the best for a wall out of doors

**Muscat of Alexandria**, white, a deservedly esteemed variety, requires heat and hangs late, the best Muscat grown

**Muscat, Cannon Hall**, white, larger bunches and berries than Muscat of Alexandria

**Muscat Champion**, dark red, an excellent variety, it possesses all the characteristics of the Hamburg with a decided Muscat flavour

**Muscat Hamburg**, black, an excellent variety, with the berry and flesh of the Black Hamburg and a Muscat flavour, requires heat

**Prince of Wales**, black, a sport from Mrs. Pince, large oval berries, good flavour slightly Muscat, long tapering large bunches, hangs late. F.C.C.

**Reine Olga**, reddish, large bunches, round berries of good flavour, one of the best for culture out-of-doors

**Strong Cane showing fruiting capabilities in the second year.**

**VEITCH'S FRUIT TREES****GRAPES.**

**St. Peter's, West's**, black, a fine late-keeping variety, requires heat

**Strawberry**, black, bunches small and well set, berries small, roundish oval, sweet, perfume resembling strawberry

**Sweetwater, White**, white, a popular early white grape, but sets badly

**Tokay, White**, white, bunches large and compact, flesh tender, juicy and richly flavoured

**SELECTIONS OF GRAPES****FOR WALLS AND OUT OF DOORS.**

Pyramids in pots for orchard-house culture of the varieties marked thus ★

5/- 25/-

Advance, medium size, greenish, good flavour

mid. of Aug.

★ **Albert Victor**, large, green with dull red cheek, flesh melting and good

mid. of Sept.

★ **Balgowan**, large, oval, highly coloured, fine flavour, a valuable variety

end of Aug.

★ **Byron**, a large late orange nectarine, flavour rich and excellent

beg. of Sept.

★ Can be supplied in pots for orchard-house culture.

## VEITCH'S FRUIT TREES

## NECTARINES (continued).

- ★ **Cardinal**, medium size, with a richly-coloured skin and exquisitely-flavoured flesh. It is best suited for culture under glass, its luscious fruits can then be ripened ten days earlier than the well-known Early Rivers. F.C.C. end of July
- ★ **Chaucer**, large, flesh green and of very fine flavour September
- ★ **Darwin**, an orange nectarine, handsome and rich, with a distinct Stanwick flavour, ripens a week earlier than Rivers' Early Orange beg. of Aug.
- ★ **Downton Improved**, large, rich, with a slight Stanwick flavour, the tree is hardy and a good bearer August
- ★ **Dryden**, very large, flesh white and finely flavoured, skin red and purple, good grower and bearer beg. of Aug.
- ★ **Elruge**, medium size, melting, juicy and richly flavoured, one of the best end of Aug.
- ★ **Early Rivers**, one of the earliest of nectarines, fruit large, tender and juicy, with a decided Stanwick flavour, a heavy and constant cropper. F.C.C. end of July
- ★ **Goldoni**, small, orange-yellow streaked with crimson, flesh rich and juicy, a healthy grower and very abundant bearer. F.C.C. August
- ★ **Hardwicke Seedling**, large, melting, rich, hardy and excellent end of Aug.
- ★ **Humboldt**, a very large nectarine raised from Pine apple, larger than but equal to it in flavour, a highly coloured and handsome fruit of the Orange section, it bears abundantly and the fruit hangs well beg. of Sept.
- ★ **Lord Napier**, large and handsome, flesh white, melting, juicy, with a rich Stanwick flavour, one of the best of the early nectarines, either for inside or outside culture. F.C.C. early in Aug.
- ★ **Milton**, large, oval, skin yellowish green on the shaded side, deep rose next the sun, flesh greenish white, juicy and richly flavoured mid. of Sept.
- ★ **Newton**, large, mottled with deep red on the sunny side, flesh richly flavoured, a hardy and very late variety mid. of Sept.
- ★ **Pine Apple**, large, handsome, very rich and exquisitely flavoured, it is a seedling from Pitmaston Orange and ripens a week later than that variety beg. of Sept.
- ★ **Pitmaston Orange**, large, a deliciously flavoured variety and an excellent bearer, the tree is a slow grower and rather delicate end of Aug.
- ★ **Précoce de Croncels**, large, spotted with scarlet on the shaded side, deep crimson on the exposed side, flesh melting, with a rich luscious flavour. A.M. end of July
- ★ **Prince of Wales**, very large and richly flavoured, the tree requires a warm situation mid. of Sept.
- ★ **Rivers' Early Orange**, large, much resembling its parent the Pitmaston orange, but ripens a week earlier mid. of Aug.
- ★ **Rivers' White**, medium size, about a week earlier than the White Nectarine, it requires a dry soil and warm situation, it is best grown under glass mid. of Aug.
- ★ **Spencer**, large and handsome, deep crimson, but on exposed side mahogany-red, flesh exquisitely flavoured, one of the best nectarines for exhibition September
- ★ **Stanwick Elruge**, large, melting and rich, with Stanwick flavour but somewhat earlier early in Sept.
- ★ **Victoria**, large, rich and sugary, with a distinct Stanwick flavour, requires a warm situation, and should be grown under glass. F.C.C. end of Sept.
- ★ **Violette Hâtive**, large and richly flavoured, well adapted for forcing end of Aug.

★ Can be supplied in pots for orchard-house culture.

## NINE BEST NECTARINES IN THE ORDER OF THEIR RIPENING.

Cardinal  
Early Rivers  
Lord Napier

Rivers' Early Orange  
Violette Hâtive  
Stanwick Elruge

Humboldt  
Pine Apple  
Victoria

**Pyramid Nectarine.**

## NUTS AND FILBERTS

BUSHES, 2 to 3 ft.	6/- doz,
„ 3 to 4 ft.	9/- and 12/- „
„ 4 to 5 ft.	18/- and 24/- „

Good fruiting bushes.

### NUTS.

**Brunswick Cob**, good bearer

**Close-Headed Prolific**, good flavour, large bunches

**Cosford Cob**, great bearer, fine quality, very thin shell

**Daviana**, kernel of excellent flavour, shell thin, and of a very brown colour

**Emperor**, large, of good quality

**Kentish Cob**, large, prolific and late, very suitable for market purposes

**Louis Berger**, a free bearer, extra large bunches

**Merveille de Bollwyller**, large, kernel of fine flavour, shell thick, a strong grower and very prolific

**Prize Exhibition Cob**, handsome and a good bearer

**Reigate Cob**, prolific bearer

**Trebizond**, very fine, thin shelled, weak grower

### FILBERTS.

**Prize Exhibition**, medium size, fine flavour

**Red Skinned**, fine flavour, skin dark red

**White Skinned**, excellent flavour, an abundant bearer

Nuts and Filberts are suitable for growing on poor, stony soil, or the sides of lakes and woods in partial shade.

In better positions standard fruit trees may be grown above planted thinly.

Attention to an annual thinning of the branches is essential and the trouble will amply repay with better crops.

January and February are suitable months to prune, as if this be delayed the flowers of the early year are liable to injury.

## ORANGES AND LEMONS.

Small plants in pots

3s. 6d. each and upwards.

Large plants in tubs, prices on application.

### ORANGES OF COMMERCE.

**Botelha**

**Egg**

<b>Pyramids in pots for orchard-house culture of the varieties marked thus *</b>			5/- to 25/-

The following varieties are those we consider most worthy of cultivation.

	Season
<b>A-pec</b> , a large and valuable early peach of delicious flavour, tree tender but one of the best for second early house	mid. of Aug.
★ <b>Alexandra Noblesse</b> , very large, handsome and excellent, a seedling from the old Noblesse, retaining all its good qualities, but is of more robust growth and not subject to mildew	e. Aug., b. Sept.
★ <b>Amsden June</b> , a fine American peach ripening a fortnight earlier than Hale's early. F.C.C.	mid. of July
★ <b>Barrington</b> , large, melting and excellent, the tree grows vigorously and bears well, flowers large	mid. of Sept.
<b>Bellegarde</b> , large, rich, juicy and vinous, forces well, one of the best, a great bearer, flowers small. F.C.C.	mid. of Sept.
★ <b>Condor</b> , large and handsome, colour bright crimson, flavour piquant and rich, good for forcing	beg. of Aug.
★ <b>Crimson Galande</b> , large, melting and deliciously flavoured, tree hardy and prolific, a freestone with small flowers	end of Aug.
★ <b>Dr. Hogg</b> , large, melting and rich, suitable for exhibition, requires a warm situation	mid. of Aug.
★ <b>Duchess of Cornwall</b> , medium, with a yellowish skin and red cheek, flavour rich and distinctly nectarine. A.M.	mid. of July
★ <b>Duke of York</b> , medium size, freestone, highly coloured, melting, good flavour, a reliable early variety	mid. of July
★ <b>Dymond</b> , an exceedingly fine, large and deliciously-flavoured peach, unsurpassed for exhibition	mid. of Aug.
★ <b>Early Alexander</b> , large, handsome and richly-coloured, flesh juicy and sweet	mid. of July
★ <b>Early Alfred</b> , large, melting, rich and delicious, the tree is hardy, robust and a great bearer, one of the most desirable early peaches, flowers large	beg. of Aug.
★ <b>Early Grosse Mignonne</b> , medium size, very juicy, richly flavoured	beg. of Aug.
★ <b>Early Rivers</b> , large, melting and richly flavoured, flowers large, rather delicate	end of July
★ <b>Early Silver</b> , large, melting and of delicious flavour, extra fine, large flowers	m. to e. Aug.
<b>Gladstone</b> , large, flesh white, tender and melting, with a rich vinous flavour, succeeding Princess of Wales	beg. of Oct.

★ Can be supplied in pots for orchard-house culture.

## VEITCH'S FRUIT TREES

## PEACHES.

	Season
★ <b>Golden Eagle</b> , very large, measuring 10 inches round, of bright lemon colour, flavour rich and piquant	beg. of Oct.
★ <b>Goshawk</b> , large, exquisite flavour	beg. of Sept.
★ <b>Grosse Mignonne</b> , large, melting and excellent, forces well, one of the best mid-season peaches, flowers large	end of Aug. & beg of Sept.
★ <b>Hale's Early</b> , large and handsome, one of the best early varieties. F.C.C.	end of July
★ <b>Lady Palmerston</b> , large, very handsome, flesh yellow, melting and good, flowers small	end of Sept.
★ <b>Late Admirable</b> , large, one of the best late peaches, forces well	end of Sept.
★ <b>Late Devonian</b> , large and handsome, greenish yellow on the shaded side, dark crimson where it is exposed to the sun, flesh juicy and melting, with a rich and crisp flavour. F.C.C.	mid. of Sept.
★ <b>Marquis of Downshire</b> ( <i>Royal Ascot</i> ), very large, flesh tender, juicy, melting, highly flavoured, stained with red at the stone, forces well	end of Sept.
★ <b>Nectarine Peach</b> , very large, skin smooth and pale, flesh melting and rich, a good late kind	end of Sept.
★ <b>Noblesse</b> , large, melting and richly flavoured, one of the best, forces well	e. Aug. b. Sept.
★ <b>Peregrine</b> , large, highly coloured, good flavour, useful for all purposes	early Aug.
★ <b>Prince of Wales</b> , very large, rich and finely flavoured	mid of Sept.
★ <b>Princess of Wales</b> , very large and handsome, cream-coloured, sparingly marked with red, rich and excellent, flowers exceptionally fine, a very valuable variety	end of Sept.
★ <b>Rivers' Early York</b> , medium size, delicate and richly flavoured	early in Aug.
★ <b>Royal George</b> , large, melting and richly flavoured, well adapted for forcing and bears freely, one of the best	end of Aug. & beg. of Sept.
★ <b>Sea Eagle</b> , a very large peach, pale in colour and of high flavour	end of Sept.
★ <b>Stirling Castle</b> , large and finely coloured, very juicy, melting and richly flavoured, forces well, one of the best	September
★ <b>Thomas Rivers</b> , large, round freestone, bright red cheek, flesh firm, juicy and of good flavour. F.C.C.	end of Sept.
★ <b>Violette Hâtive</b> , large, melting, rich and excellent, the tree is hardy, prolific and forces well, one of the best and hardiest peaches grown	mid of Sept.
★ <b>Waterloo</b> , a fine American peach, medium size, pale greenish yellow with a bright red cheek, valuable on account of its earliness. F.C.C.	mid of July

★ Can be supplied in pots for orchard-house culture.

<b>Standards</b>	2/-	3/6

Special quotations for large quantities.

**N.B.**—Pyramids, dwarfs, trained and cordon trees of all kinds can be supplied on the pear or quince stock respectively, with the exception of a few which succeed on the quince stock only when **DOUBLE GRAFTED**. Of these there is a large stock and in the list they are marked **D.G.**

Those marked thus **△** require in cool climates a wall or warm situation.

	Season.
<b>Alexandre Lambre,</b> medium size, melting and well-flavoured, the tree forms a large pyramid and succeeds well on the quince stock as a cordon	Nov. to Jan.
<b>Baron Leroy,</b> resembles Chaumontel in size and appearance, flesh sweet and of rich flavour	November
<b>Baronne de Mello,</b> medium size, buttery, melting and deliciously flavoured, the tree is hardy and grows well on the quince	beg. of Nov.
<b>Beacon,</b> large and handsome, flesh sweet and melting, tree very prolific, a good orchard pear and also valuable for market, it forms a medium-sized pyramid, and a good cordon on the quince	August
<b>Bellissime d'Hiver,</b> large, flesh white, crisp, tender and sweet, one of the best stewing pears, bears freely, and is useful for orchard planting, good as a pyramid or cordon. See illustration	Nov. to April
<b>Bergamotte Dussart,</b> medium size, juicy, sweet and well flavoured, an excellent dessert variety, forms a large pyramid	Dec. & Jan.
<b>Bergamotte Esperen,</b> medium size, melting, juicy and richly-flavoured, forms a prolific pyramid and succeeds well on the quince, very fine fruits of this variety can be obtained against a wall, particularly from cordons	Feb. to April
<b>Beurré Alexandre Lucas,</b> large and handsome, flesh tender and juicy, a strong grower, succeeds well as a standard	Oct. & Nov.

★ Can be supplied in pots for orchard-house culture.

	Season
<b>Beurré Bachelier</b> , large and handsome, the tree forms a prolific pyramid and succeeds well on the quince, either as a pyramid or a cordon, not one of the best flavoured varieties	December
<b>Beurré Baltet père</b> , large and of excellent quality, good bearer, either as a pyramid or cordon	November
<b>Beurré Bosc</b> , D.G., large, rich and delicious, the tree is a great bearer and generally succeeds best against a wall either trained as a dwarf or cordon, it forms a medium-sized pyramid	Oct. & Nov.
<b>Beurré Capiaumont</b> , medium size, finely coloured, flesh delicate and nicely flavoured, the tree is hardy, a great bearer and succeeds well in the north, it forms a medium-sized pyramid and a good cordon on the quince	October
<b>Beurré Clairgeau</b> , D.G., large, handsomely formed and beautifully coloured, flavour not of the best, should be grown for its beauty, it forms a medium-sized pyramid and a good cordon	November
★ <b>Beurré d'Amanlis</b> , <i>Backhouse's Beurré</i> , large, buttery, melting and richly flavoured, an excellent autumn pear, succeeds well in almost any soil on either the pear or quince stock	September
<b>Beurré d'Anjou</b> , <i>Beurré gris</i> , large and melting, the tree forms a handsome pyramid and grows well on the quince cordon-trained	December
<b>Beurré d'Arenberg</b> , <i>Beurré d'Arenberg</i> , medium size, melting and juicy, the tree is an abundant bearer, forming a medium-sized pyramid and a good cordon	Dec. & Jan.
<b>Beurré de Jonghe</b> , D.G., Δ medium size, melting, very juicy, richly flavoured and highly perfumed, a very fine pear for a wall. F.C.C.	Dec. to Feb.
<b>Beurré de Mortillet</b> , D.G., very large and handsome, with bright red cheek, flesh white and pleasantly flavoured, by double grafting it forms a fine cordon	September
<b>Beurré de Naghan</b> , large, first-rate quality, skin greenish yellow	Nov. to Jan.
★ <b>Beurré Diel</b> , very large and excellent, the tree is a good bearer and succeeds well on the quince, but should be trained in a bush form rather than a pyramid, produces very fine fruit against a wall, useful for orchard planting	Nov. & Dec.
<b>Beurré Dubuisson</b> , large, pyriform, pale yellow thickly spotted with russet, flesh melting, juicy, sweet and aromatic, it forms a medium-sized pyramid. F.C.C.	December
<b>Beurré Dumont</b> , medium size, rich flavour, with fine musky perfume, it forms a medium-sized pyramid and a good cordon on the quince	Nov. & Dec.
★ <b>Beurré Fouqueray</b> , large and handsome, very hardy, free bearing, a sturdy grower forming a good pyramid or cordon on both pear and quince stock. F.C.C.	Oct. & Nov.
★ <b>Beurré Giffard</b> , medium size, melting, juicy and perfumed, a good summer pear, makes a good spreading pyramid, dwarf or bush on the pear or quince stock	mid. of Aug.
★ <b>Beurré Hardy</b> , large and handsome, richly flavoured and highly perfumed, the tree bears abundantly and forms a large pyramid on either stock, a very fine variety, ranking amongst the very best	October
<b>Beurré Perran</b> , medium, short and thick, with an irregular surface, pale yellow, thickly covered with russet, flesh melting rich and good, a valuable late variety. F.C.C.	Dec. to Feb.
<b>Beurré Rance</b> , D.G., Δ large, melting, very juicy and richly flavoured, tree hardy, vigorous and prolific, it succeeds well as a standard and also forms a very large pyramid, one of the most valuable late pears, should be grown on a wall in cold districts	Feb. to May
<b>Beurré Sterckmans</b> , large, tender, juicy and delicious, a fine late pear, it forms a large pyramid and bears well	Jan. & Feb.

★ Can be supplied in pots for orchard-house culture.

## PEARS.

	Season
★ <b>Beurré superfin</b> , large and handsome, buttery, melting and exquisitely flavoured, bears abundantly on either stock and forms a good cordon on the quince, one of the very best	Sept. to Oct.
<b>Brockworth Park</b> , large, handsome, melting and excellent, it forms a medium-sized pyramid and a good cordon. F.C.C.	September
<b>Brown Beurré</b> , D.G., Δ large and richly flavoured with a high aroma, requires a wall, bears freely as a cordon	October
<b>Calebasse Grosse</b> , <i>Van Marum or Grosse Calebasse</i> , very large, skin pale straw colour, with a few patches of reddish russet, flesh crisp, juicy and sweet, it makes a good stewing pear before it is ripe, the tree is vigorous and very prolific	October
<b>Catillac</b> , very large, the tree is vigorous and bears freely, its fruit being very heavy, it is best grown as a dwarf, one of the best stewing pears	Dec. to April
★ <b>Charles Ernest</b> , large and handsome, of a yellowish colour, faint crimson on the side next the sun, speckled with russet dots, flesh exceedingly juicy and melting, of good flavour, a valuable late variety. Tree of distinct habit forming an erect pyramid, also a good espalier or cordon, bears well on the quince stock. F.C.C.	Oct. to Dec.
<b>Chaumontel</b> , Δ large, melting, richly flavoured and highly perfumed, requires a good rich soil and a warm situation or wall, but will thrive as a standard, cordons against a south or south-west wall bear freely	Dec. to Feb.
<b>Citron des Carmes</b> , small, greenish yellow with a faint tinge of reddish brown on the side next the sun, flesh juicy, sweet and well flavoured	August
★ <b>Clapp's Favourite</b> , large and very handsome, yellow striped and flushed with bright crimson, ripens earlier than Williams' Bon Chrétien, requires to be eaten almost as soon as gathered, thrives well on the quince stock either as a pyramid or trained tree	mid. of Aug.
<b>Comte de Lamy</b> , below medium size, rich, sugary and highly flavoured, one of the best autumn pears, particularly in the south, it forms a medium-sized pyramid and bears freely as a cordon. At the Fruit Conference this pear was selected as possessing the best flavour of any	October
★ <b>Conference</b> , large, bright yellow for about an inch below the stalk, beyond which it is covered with russet, flesh salmon colour, by which this pear may be readily distinguished, rich, melting, juicy and buttery. F.C.C.	November
<b>Conseiller de la Cour</b> , <i>Maréchal de Cour</i> , above medium size with a yellowish green skin and sub-acid juicy flesh of pleasant flavour, the tree grows vigorously on the quince stock, forming fine large pyramids, as a standard it is equally good, one of the best	Oct. & Nov.
<b>Dana's Hovey</b> , D.G., small, yellow when fully ripened, dotted and veined with russet, flesh yellowish, melting and delicious, the sweetest of all pears, a very neat grower A.M.	October
<b>Directeur Alphand</b> , extra large, flesh white, firm, slightly granular towards the centre, sweet and pleasant aroma, a valuable baking pear, it forms a medium-sized pyramid	Feb. to May.
★ <b>Directeur Hardy</b> , large and handsome with delicate, juicy, melting flesh of sweet flavour, tree vigorous and prolific. A.M.	Oct. & Nov.
★ <b>Doyenné Boussoch</b> , very large and handsome, the tree forms a good pyramid and succeeds well on the quince, also as a bush or an espalier	October
<b>Doyenné d'Alençon</b> , Δ medium size, greenish yellow when ripe, thickly spotted with grey or green dots, flesh white, melting and richly flavoured, makes a good pyramid, bears freely, an excellent late variety. A.M.	Dec. to Mar.

★ Can be supplied in pots for orchard-house culture.

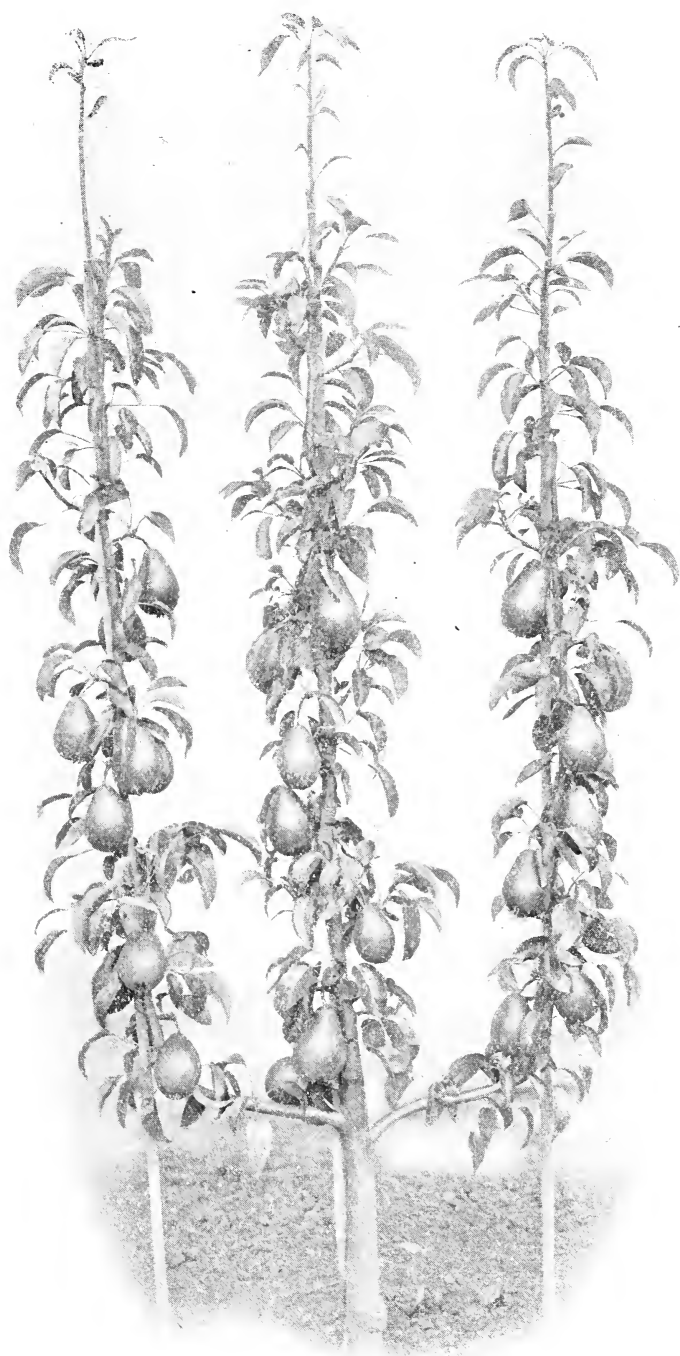

**Pear—Glou Morceau, Single Cordon** see page 48.

## PEARS.

	Season
★ <b>Doyenné du Comice</b> , large, melting, juicy, sweet and most exquisitely flavoured, the tree forms a fine pyramid and succeeds well on the quince, the best of all pears, it may be grown as a pyramid, trained tree, or cordon, particularly fine fruit can be obtained under glass. F.C.C.	Oct. & Nov.
<b>Doyenné d'Été</b> , D.G., small, the best of the very early pears, requires to be eaten as soon as gathered, it forms a small and very neat pyramid and is useful for orchard planting	end of July
★ <b>Dr. Jules Guyot</b> , large, oblong-obovate, resembling William's Bon Chrétien, skin pale yellow, faint crimson-blush on the side exposed to the sun, flesh tender, melting, very juicy and of good flavour. Tree very prolific	September
★ <b>Duchesse d'Angoulême</b> , very large and in favourable seasons melting, and of high excellence, it is best grown as a pyramid or a cordon on the quince	Oct. & Nov.
<b>Duchesse de Bordeaux</b> , medium size, russet skin, flesh with a rich Beurré flavour, moderate but healthy grower. F.C.C.	Feb. & Mar.
<b>Durondeau</b> , large and beautifully coloured, melting, sweet and richly flavoured, the tree forms a prolific pyramid on either stock and bears freely as an espalier or cordon	Oct. & Nov.
<b>Easter Beurré</b> , D.G., large, buttery, melting and highly flavoured, hardy and a great bearer, it forms a medium-sized pyramid and a good cordon on the quince	Jan. to Mar.
★ <b>Emile d'Heyst</b> , large, flesh tender, very rich, juicy, sugary and with a fine perfume, one of the best autumn pears, thrives on the quince stock and bears most freely, very useful for orchard culture. F.C.C.	Oct. & Nov.
<b>Fertility</b> , above medium size, vigorous, healthy and free bearing, thrives well on either stock, valuable for market	September
★ <b>Fondante d'Automne</b> , large, melting, juicy, deliciously flavoured and perfumed, it forms a large pyramid, thrives well on either stock and is useful for orchard culture	Sept. & Oct.
★ <b>Fondante de Thirriot</b> , large and handsome, skin green, irregularly covered with russet, melting, juicy and deliciously flavoured. Very prolific and succeeds on the quince stock	Nov. & Dec.
<b>Forelle</b> D.G., medium size, melting and delicate, skin handsomely coloured and spotted, a good grower	Nov. to Feb.
<b>Gansel's Bergamot</b> D.G. Δ large, melting and rich, with a high aroma, succeeds best when grown as an espalier or cordon against a wall	Oct. & Nov.
<b>General Todleben</b> , very large, melting, juicy, richly flavoured and perfumed, forms a handsome pyramid and grows well on the quince, useful for stewing purposes	Nov. & Dec.
<b>Gilgil</b> , large, a good stewing pear, hardy and free on the pear stock	Nov. & Dec.
★ <b>Glou Morceau</b> Δ <i>Beurré d'Hardenpont</i> , large, buttery, melting, rich and delicious, forms a fine cordon or pyramid and grows vigorously on the quince, against a wall or in a sheltered situation this variety is particularly fine. See illustration page 47	Dec. & Jan.
<b>Gratioli of Jersey</b> , medium size, melting, juicy, very sweet and highly flavoured, forms a good standard	October
<b>Hacon's Incomparable</b> , large, melting, rich and highly perfumed, the tree forms a prolific pyramid on the quince but does not always bear well on the pear stock	Nov. to Jan.
<b>Hessle</b> , below medium size, skin greenish-yellow covered with russet dots, flesh tender, sweet and aromatic, tree very hardy and forms a fine standard	October

★ Can be supplied in pots for orchard-house culture.

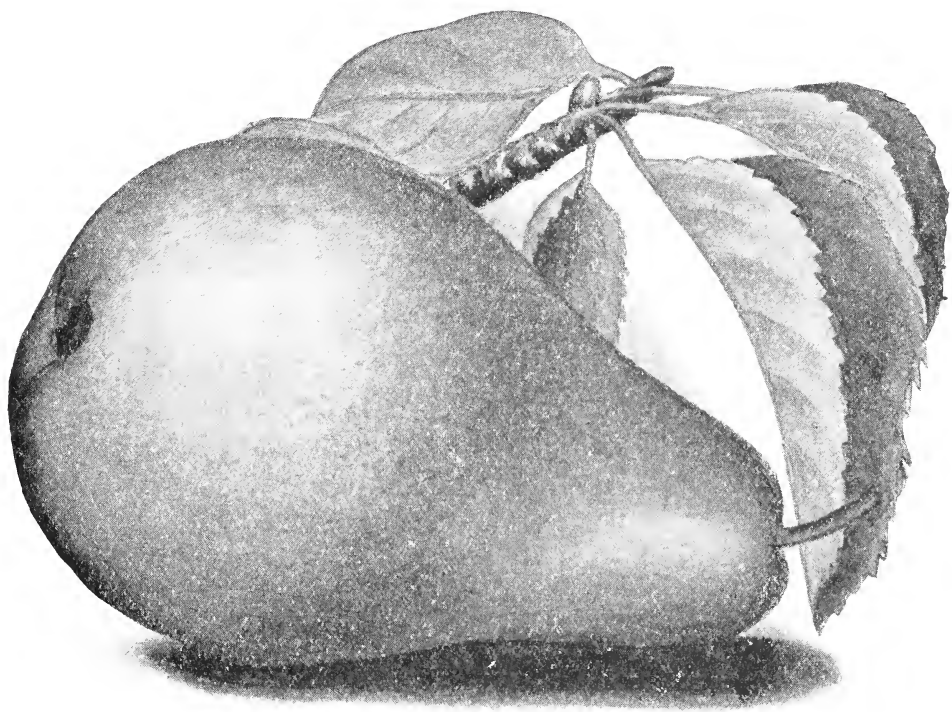

**Triple Cordon Pear—Louise Bonne of Jersey, see page 50.**

## VEITCH'S FRUIT TREES

## PEARS.

	Season
<b>Huyshe's Prince Consort</b> , large, melting, juicy and deliciously flavoured, a remarkably fine pear, forms a large pyramid and good cordon on the quince stock	November
<b>Huyshe's Victoria</b> , medium size, melting, juicy and rich, it forms a medium-sized pyramid and succeeds well as a cordon on the quince stock	Dec. & Jan.
★ <b>Jargonelle</b> , a large and well-known old pear of excellent quality, forms a fine standard or pyramid, extra fine fruit is produced against a wall 8 <small>feet high</small>	August
★ <b>Josephine de Malines</b> D.G. Δ medium size, melting, very juicy, rich and delicious, one of the best, the tree is hardy and prolific and for pyramids or cordons should be double grafted. F.C.C.	Jan. & Feb.
<b>Knight's Monarch</b> D.G. Δ medium size, richly flavoured, the tree forms a handsome pyramid and bears well, should not be thinned as it is apt to drop its fruit, a most valuable variety	Dec. to Feb.
<b>Le Lectier</b> , large, with a mottled green skin, flesh melting and juicy, vigorous grower. F.C.C.	Jan. to Mar.
★ <b>Louise Bonne of Jersey</b> , large and very handsome, buttery, melting and finely flavoured, one of the best autumn pears, forms a good pyramid on the quince and is a great bearer. See illustration page 49	October
<b>Madame Millet</b> Δ medium size, delicious, is improved by being grown against a wall, forms a small pyramid and is good as a cordon	Mar. to May
★ <b>Madame Treyve</b> , large, melting and richly flavoured, bears most profusely, an excellent early variety, it forms a medium-sized pyramid and is useful for orchard culture	September
<b>Magnate</b> , large, yellow, crimson and brown on the exposed side. flesh melting and juicy, tree robust and hardy and succeeds well on the quince, it forms a large pyramid and a good cordon	Oct. & Nov.
★ <b>Marguerite Marillat</b> D.G., very large, flesh juicy, sweet, with a pleasant aroma, a strong grower and free bearer, one of the best. A.M.	Aug. & Sept.
★ <b>Marie Benoist</b> Δ large, melting and rich, a prolific bearer and one of the best late-keeping pears, forms a good cordon or pyramid on the quince	Dec. & Feb.
★ <b>Marie Louise</b> D.G., large, melting and richly flavoured, one of the finest pears known, particularly when grown against a wall, it forms a large pyramid and thrives well as an orchard tree, but the fruit from a standard is smaller	Oct. & Nov.
<b>Marie Louise d'Uccle</b> , large and handsome, the tree grows vigorously on the quince and bears with extraordinary fertility, it forms a large pyramid	October
<b>Napoleon</b> , medium size, and well flavoured	Nov. & Dec.
<b>Nec plus Meuris</b> D.G. Δ medium size, succeeds well as a pyramid, but is best against a wall, this variety does not succeed well on the quince, but double grafted or on the pear it is late and of the very highest excellence	Mar. & April
<b>Nouveau Poiteau</b> , large, pale yellow with a russety streaking, flesh melting and juicy, vigorous grower	November
★ <b>Nouvelle Fulvie</b> , large, pyriform, skin yellow, thickly spotted with russet, with a red cheek on the side exposed to the sun, flesh melting, very juicy and of exquisite flavour, a valuable late dessert pear. The tree forms a medium-sized pyramid and bears well as a cordon on the quince stock. F.C.C.	January
★ <b>Olivier de Serres</b> Δ medium size, flesh buttery, sweet and vinous, one of the best late pears, forms a fine tree on the quince stock as pyramid, trained or cordon. A.M.	Feb. & Mar.

★ Can be supplied in pots for orchard-house culture.

**Fine Dessert Pear—Triomphe de Vienne, see page 52.**

## VEITCH'S FRUIT TREES

## PEARS.

	Season
<b>Passe Colmar</b> , medium size, excellent, highly flavoured and melting, the tree forms a good cordon on the quince or a medium-sized pyramid and bears abundantly, succeeding best in a rich warm soil	Nov. & Dec.
<b>Passe Crassane</b> D.G. Δ medium size, melting and well flavoured, an extremely fine late pear with an aromatic flavour. F.C.C.	Feb. & Mar.
★ <b>Pitmaston Duchess</b> , very large and handsome, melting and richly flavoured, it forms a large pyramid and good cordon, on account of its large size it is not advisable to grow it as a standard. F.C.C.	October
★ <b>President Barabé</b> , large, with lemon-yellow skin and greenish-white flesh, which is melting and juicy with a pleasant aroma, quite hardy and very prolific. succeeds best on the pear stock. F.C.C.	Dec. & Jan.
<b>President d'Osmonville</b> , large and long, pale yellow, flesh melting and juicy, flavour rich and excellent	October
★ <b>Princess</b> , large and handsome, resembling Louise Bonne of Jersey but keeps later, flesh sweet and melting, forms a large pyramid and succeeds well as a cordon on the quince stock	Nov. & Dec.
<b>Seckle</b> D.G., small, melting and highly perfumed, a delicious little pear, the tree forms a prolific pyramid on the pear stock, a good cordon on the quince and is valuable for orchard culture	October
★ <b>Souvenir du Congrès</b> D.G., very large, melting, juicy, highly perfumed and excellent, a seedling from Williams' Bon Chrétien, very good against a wall, useful for orchard culture	August
<b>St. Edmund</b> , medium size, flesh melting, aromatic and richly flavoured, tree moderate grower	November
<b>St. Lézin</b> , large and handsome, flesh firm, juicy and sweet, a good grower and free bearer, an excellent stewing pear	Sept. & Oct.
<b>St. Luke</b> D.G., very large and handsome, with russet skin, flesh juicy, melting and richly flavoured	October
★ <b>Thompson</b> , medium size, skin pale yellow, covered with a coating of pale cinnamon-coloured russet, flesh buttery and melting, highly flavoured and delicious, quite hardy and a free bearer, one of the very best pears, useful for orchard culture, succeeds well on the pear stock	November
<b>Triomphe de Jodoigne</b> , large, skin yellow covered with small russet dots, flesh white, juicy and brisk, with an agreeable musky perfume, vigorous	Nov. & Dec.
★ <b>Triomphe de Vienne</b> , large and handsome, flavour rich, tree very prolific and of a strong vigorous habit, a variety of great value. A.M. See illustration page 51	September
<b>Uvedale's St. Germain</b> D.G., a very large and excellent stewing pear, with a dark green skin, dotted all over with bright brown and a few tracings of russet, a prolific bearer	Jan. to May
<b>Van Mons</b> D.G., <i>Léon Leclerc</i> , very large and handsome, buttery, melting and deliciously flavoured, in warm situations this pear is particularly fine, as a standard on the pear stock it is useful for orchard culture	November
<b>Verulam</b> , large, excellent for stewing, an extremely free bearer, in very favourable seasons this variety is fit for dessert, it forms a large pyramid and is good as a standard	Jan. to Mar.
<b>Vicar of Winkfield</b> , large, long and handsome, a good stewing pear and when grown in a favourable situation and well ripened it is melting and well flavoured, it forms a large pyramid and an excellent cordon on the quince stock, an abundant bearer	Dec. & Jan.
<b>White Doyenné</b> , <i>Doyenné blanc</i> , medium size, melting, delicate and richly flavoured, the tree forms a handsome pyramid, succeeds well on the quince stock and is a great and constant bearer	Sept. & Oct.

★ Can be supplied in pots for orchard-house culture.

**Pear—Williams' Bon Chrétien, see page 54.**

## VEITCH'S FRUIT TREES

## PEARS.

	Season

Fondante d'Automne	Conference	Bergamotte Esperen.

## PLUMS.

	12/- per doz.	Each	Each
Dwarf maidens		—	1/6
Fan trained, 7 to 13 shoots		3/6 to 5/-	
„ „ extra size		7/6	10/6
Cordons, upright single		2/-	3/6
„ „ double and triple		3/6	5/-
Gridiron-trained, a few varieties		5/-	7/6
Pyramids		2/6	7/6
„ in pots, for orchard-house culture of the varieties marked thus ★		5/-	10/6
Standards, trained		5/-	10/6
„ for orchards		2/-	3/6
„ „ extra size		5/-	7/6

### Special quotations for large quantities.

Plums, usually grown as dwarf-trained trees, may be successfully cultivated as pyramids, and should be lifted occasionally and root-pruned: thin the branches to admit light into the centre of the tree to induce the production of fruit spurs.

**Admiral**, a large and excellent kitchen plum, somewhat resembling Monarch but ripening later, tree a close grower and an abundant bearer ... October

**Angelina Burdett**, medium size, round, dark purple, juicy and richly flavoured, a good dessert plum August

**Archduke**, large, oval, purple, a good kitchen variety either as pyramid, or wall tree, very hardy and prolific October

★ **Belgian Purple**, large, nearly round, deep purple, juicy and richly flavoured, suitable for kitchen use or dessert, forms a good pyramid, cordon or standard mid. of Aug.

★ **Belle de Louvain**, very large and handsome, purple, it forms a fine free-bearing pyramid, or wall tree, very valuable for kitchen purposes August

★ Can be supplied in pots for orchard-house culture.

## PLUMS.

	Season
<b>Belle de Septembre</b> , medium size, reddish purple, excellent for cooking or preserving, the tree forms a small pyramid	early in Oct.
<b>Blue Imperatrice</b> , medium size, deep purple, sweet and richly flavoured when allowed to hang, excellent for preserving	October
<b>Blue Rock</b> , medium size, rich flavour, a freestone variety	end of July
<b>Bonne Bouche Gage</b> , medium size, a deliciously flavoured gage, succeeding well as a standard for orchard culture. F.C.C.	September
<b>Brahys Green Gage</b> , large, similar to the old Green Gage in flavour	end of Sept.
★ <b>Brandy Gage</b> , above medium size, yellow with dense white bloom, flavour rich, tree vigorous and prolific, one of the best	end of July
★ <b>Bryanston Green Gage</b> , large, an excellent variety of Green Gage, very rich flavour, tree hardy and prolific, good as a pyramid or cordon	end of Sept.
<b>Bullace, The Langley</b> , a seedling from The Farleigh damson and Black Orleans plum, a very valuable addition to hardy stone fruits, of purple colour and good size the fruit is of excellent flavour and produced in extraordinary abundance	November
★ <b>Coe's Golden Drop</b> , very large, oval, pale yellow, rich and delicious, one of the finest late plums for dessert or preserving, particularly if allowed to hang late on the trees	end of Sept.
<b>Coe's Late Red</b> , medium size, bright purple, juicy and sweet, valuable only for its lateness	end of Oct.
<b>Coe's Violet</b> , large, oval, purple, excellent flavour, good cropper. A first-rate dessert variety	October.
★ <b>Czar</b> , a large, oval, reddish purple plum, valuable for cooking and dessert, a hardy and vigorous grower, very useful for orchard planting, a good cropper that does not crack	early in Aug.
<b>Damson, Bradley's King</b> , a fine variety, of brisk sweet flavour, prolific, one of the best	Sept. & Oct.
<b>Damson, Cluster or Farleigh</b> , very prolific	Sept. & Oct.
<b>Damson, Common</b> , well known for its preserving qualities	September
<b>Damson, Frogmore</b> , large and of excellent flavour, sweetest of all damsons, tree vigorous and prolific	September
<b>Damson Prune</b> , oval, very prolific	mid of Sept.

★ <b>De Montfort</b> , medium size, roundish, dark purple, juicy and rich, an excellent dessert plum	mid. of Aug.
★ <b>Denniston's Superb</b> , large, nearly round, greenish yellow, juicy, rich and deliciously flavoured, one of the finest plums known, a good bearer when trained as a pyramid or cordon	beg. of Aug
<b>Diamond</b> , very large, oval, deep purple, juicy and briskly flavoured, a good plum for cooking or preserving, forms a fine pyramid	mid. of Sept.
★ <b>Early Green Gage</b> , small, juicy, sugary, and of very fine flavour, good as a pyramid or cordon	end of July
★ <b>Early Mirabelle</b> , small, oval, yellow, an excellent plum for preserving, the tree is an abundant bearer and forms a handsome pyramid	mid. of July
<b>Early Orleans</b> , medium size, round purplish red, the tree is hardy and very prolific	beg. of Aug.
<b>Early Prolific, Rivers'</b> , medium size, purple, juicy, sweet and brisk, a good early plum, a great bearer	end of July
★ <b>Early Transparent Gage</b> , like the old Transparent Gage but ripens earlier, it crops so heavily as to require thinning, a most excellent variety, attaining an excellent flavour when allowed to hang, it forms a good pyramid and cordon. F.C.C.	beg. of Aug.

★ Can be supplied in pots for orchard-house culture.

**Plum. Grand Duke. (See page 58).**

	Season
<b>Frogmore, Orleans</b> , medium round, very dark purple, flesh juicy and rich	end of Sept.
<b>Giant Prune</b> , large oval, dark red, hardy, a good bearer, a kitchen plum	September
<b>Gisborne's</b> , under medium size, flesh yellow, firm, with a sweetish, briskly, acid flavour, tree hardy, an abundant bearer, useful for orchard culture	August
<b>Goliath</b> , very large, purple, only fit for preserving	end of Aug.
★ <b>Golden Transparent Gage</b> , large, bright golden yellow when ripe, a delicious late plum, strong healthy grower. F.C.C.	October
★ <b>Grand Duke</b> , a very large and good kitchen plum, suitable for kitchen or dessert, one of the best late varieties, hardy and prolific. F.C.C. (See illustration p. 57)	October
★ <b>Green Gage</b> , well known as one of the richest of all plums. The tree is a vigorous grower, hardy and an excellent bearer	end of Aug.
★ <b>Guthrie's Late Green</b> , large, round, greenish yellow, rich and juicy	end of Sept.
<b>Heron</b> , medium size, purple and red, a kitchen plum	August
★ <b>Ickworth Imperatrice</b> , medium, purple, juicy and very richly flavoured if allowed to hang till it shrivels, makes a fine pyramid	October
<b>Impériale de Milan</b> , medium, oval purple, sweet and richly flavoured, good for dessert or preserving	beg. of Oct.
<b>Italian Prune</b> ( <i>Fellemborg</i> ), large, oval, dark purple, sweet and richly flavoured, an excellent dessert and preserving plum	beg. of Sept.
★ <b>Jefferson</b> , large, oval, golden yellow mottled with red, juicy sugary rich and deliciously flavoured, one of the finest dessert plums, good as cordon or pyramid	early in Sept.
<b>July Green Gage</b> , an early form of Green Gage, suitable for a wall or a pyramid, makes a small but prolific tree	end of July
★ <b>Kirke's</b> , large, round, deep purple, covered with a dense bright blue bloom, flesh juicy, sugary and delicious, separating from the stone, one of the finest dessert plums	mid. of Sept.
<b>Late Orange</b> , large, bright orange covered with heavy bloom, flavour rich, a freestone variety. F.C.C.	end of Oct.
★ <b>Late Transparent</b> , large and round, greenish yellow, changing to purple on exposed side, flesh flavoured like the Green Gage, succeeds best when grown on a wall. F.C.C.	end of Sept.
<b>Lawson's Golden Gage</b> , medium size, roundish, oval, deep yellow speckled with crimson, juicy, sweet and richly flavoured, a fine dessert plum	September
<b>Mallard</b> , large, skin deep purple, flesh rich and juicy, tree hardy and very prolific	early in Aug.
★ <b>McLaughlin</b> , a very large and delicious Green Gage, the tree makes an excellent pyramid or cordon and bears freely	end of Aug.
<b>Monarch</b> , large, roundish oval, deep purple-blue, tree robust and an abundant bearer, a valuable late plum, particularly useful where a quantity is required for kitchen purposes. F.C.C.	end of Sept.
<b>Nectarine</b> , large and of Goliath shape, flesh dull yellow, separating from the stone, a useful plum for preserving and kitchen purposes	mid. of Aug.
★ <b>Oullins Golden</b> , large, of short oval shape, rich yellow, dotted with purple on the side exposed to the sun, flesh tender and juicy, a dessert plum	beg. of Aug.
<b>Pershire</b> , above medium size, obovate, yellow, flesh tender, a fine sub-acid flavour, useful for preserving	end of Aug.
<b>Pond's Seedling</b> , very large and handsome, dark red, juicy and briskly flavoured, a valuable kitchen plum	mid. of Sept.
<b>President</b> , very large, purple with a blue bloom, sweet and rich, a kitchen plum. F.C.C.	October
<b>Primate</b> , large, bright purplish red with a light bloom, a free stone variety, a kitchen plum. A.M.	October

★ Can be supplied in pots for orchard-house culture.

	Season
<b>Prince Englebert</b> , large, oval, dark purple, juicy, brisk and richly flavoured, one of the finest kitchen plums	end of Aug.
<b>Prince of Wales</b> , large, round, reddish purple, a good kitchen plum, the tree is a great bearer but tender	beg. of Sept.
★ <b>Reine Claude de Bavay</b> , a large variety of Green Gage, a first-rate dessert plum, of the most exquisite flavour	beg. of Oct.
★ <b>Reine Claude du Comte Hathem</b> , a large dark red gage, freestone and of excellent flavour	mid. of Sept.
★ <b>Reine Claude Violette</b> ( <i>Purple Gage</i> ), medium size, round purple, a delicious dessert plum rivalling in richness the Green Gage	beg. of Sept.
<b>St. Etienne</b> , small yellow, very useful for tarts	July
<b>St. Martin's Quetsche</b> , medium size, pale yellow, covered with a white bloom, flesh sweet and well-flavoured, separating from the stone	mid. of Oct.
<b>Smith's Early Orleans</b> , large roundish oval, light purple, juicy, rich and briskly flavoured	end of Aug.
<b>Stint</b> , small, reddish purple, flesh rich and juicy, tree a slender grower, very productive	July & Aug.
<b>Swan</b> , large, round, red, very productive, a kitchen plum	mid of Aug.
<b>The Sultan</b> , large, round, deep red, a kitchen plum. F.C.C.	August
★ <b>Transparent Gage</b> , large, round, pale yellow, marbled with red, rich and exquisitely flavoured, bears freely on cordons	beg. of Sept.
<b>Victoria</b> ( <i>Denyer's</i> ), large, bright red on the side next the sun, sweet and agreeably flavoured, one of the best kitchen plums, the tree is a prodigious bearer and should find a place in every garden	September
★ <b>Washington</b> , large and handsome, deep yellow marked with red, juicy and sweet, a valuable kitchen plum and showy for dessert	mid. of Sept.
<b>White Bullace</b> , small, yellowish white, mottled with red, hardy, a good bearer	end of Sept. to mid. Oct.
<b>White Magnum Bonum</b> , very large, oval, bright yellow, briskly flavoured, one of the best for preserving	beg. of Sept.
<b>Wyedale</b> , a late medium-sized kitchen plum, hanging well and preserving its brisk flavour till the end of October, a moderate grower	end of Oct.

★ Can be supplied in pots for orchard-house culture.

# RASPBERRIES.

**Good Canes, 2/6 & 3/- per doz. 15/- to 21/- per 100.**

**Except where otherwise priced**

## SUMMER-BEARING KINDS

**Baumforth's Seedling**, an improved Northumberland Fillbasket, one of the best

**Fastolf**, large, red, well-flavoured, a great bearer

**Hornet**, large, red, excellent. F.C.C.

**McLaren's Prolific**, large, red, excellent flavour, a good bearer

**Northumberland Fillbasket**, large, red, a strong grower and an abundant bearer

**Norwich Wonder**, large and well-flavoured, a strong grower and good cropper, one of the best, will sometimes succeed where Superlative fails

**Perfection**, large, red, vigorous grower, very prolific

**Queen of England**, large, rich yellow, of delicious flavour and borne in large clusters. 3/- and 4/- per doz. 21/- to 30/- per 100. F.C.C.

**Superlative**, large, dark red of fine flavour, heavy cropper, yielding a succession of fruit for a long time, vigorous grower, undoubtedly the best raspberry in districts where it succeeds. F.C.C.

**The Guinea**, medium size, yellow, with a pleasant brisk flavour but not so sweet as Yellow Antwerp

**Yellow Antwerp**, large, pale yellow, sweet and well-flavoured

**Yellow Superlative**, large, clear yellow, with a crisp sub-acid flavour, canes robust heavy cropper

## AUTUMN-BEARING KINDS.

**These should be cut down to the ground each spring as the fruit is borne on the young growth.**

**Belle de Fontenay**, large, round, deep red, well flavoured. F.C.C.

**October Red**, large, abundant bearer

**October Yellow**, medium size, yellow, good flavour, prolific

**November Abundance**, a splendid autumn-bearing variety derived from Catawissa and Superlative. Large, deep red, excellent flavour, unusually vigorous, if frequently transplanted will produce heavy autumn crops. F.C.C.

**Queen Alexandra**, a very fine late red variety

# STRAWBERRIES.

**We strongly recommend plants in small pots, which will bear a crop of fruit the first season after planting. The ground should be well prepared and richly manured.**

## STRAWBERRY SEEDS.

Seedling Plants of Alpine Strawberries (*Quatre-saisons varieties*) give better results than growing from runners. The seed should be sown in a shady position in the open ground in May. As soon as the young plants are sufficiently large to transplant they should be planted out in beds at a distance of 15 inches from plant to plant. These will commence to fruit when a year old.

<b>Alpine, Improved Large Red</b> , very free of robust habit, the fruits frequently measure 2 inches in length, bright red	Per Packet. 1/6
<b>Large-fruited Perpetual St. Joseph</b> , an abundant cropper good size, dark red, fine quality	1/6

## WALNUTS.

Standards	2/6 to 7/6
„ extra large trees, } exceptionally fine }	10/6 to 100/-
Bushes	1/6 to 3/6

# CULINARY ROOTS.

**Asparagus** should be planted early in April, when the soil is in good working condition. The soil should be of a good rich loamy nature. If heavy and wet a good proportion of sharp grit should be mixed with it, and the bed thoroughly drained.

The ground should be trenched early in the previous autumn to a depth of 18 inches to 2 feet, and the bed should remain exposed through the winter.

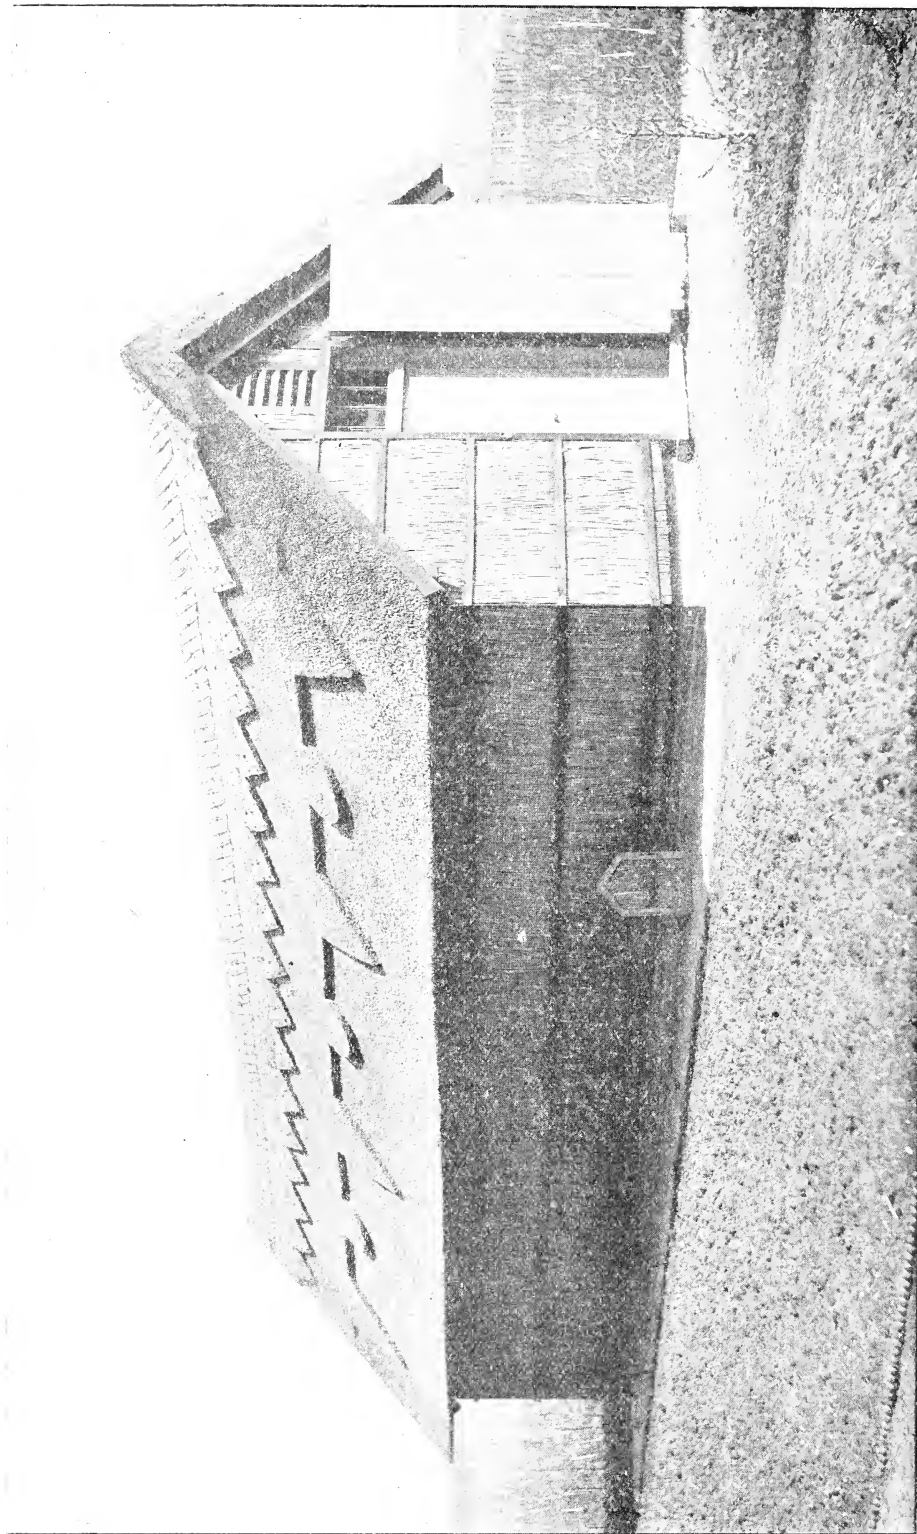

Early in February a good dressing of well decayed stable manure should be applied, to be thoroughly forked in and well mixed with the soil. The bed should be forked over again in dry weather two or three times during March.

<b>Asparagus</b> , strong for forcing		per 100, 17/6 and 21/-
